FLIGHT OF THE

INTRUDER™

Flight Of The Intruder takes you into the deadliest air combat environment the world has ever known – the skies above North Vietnam.

In 1972, the USAF launched Operation Linebacker. US forces and their South Vietnamese allies are locked in a life and death struggle with the fanatical North Vietnamese Army. You must stem the tide of the North Vietnamese offensive by cutting its vital lifeline to its front line troops.

From the US Carriers in the Gulf of Tonkin on "Yankee Station", you must attack a variety of installations defended by surface to air missiles and the MIG fighters of the skittish and determined North Vietnamese Air Force.

Only team work will get you back alive. The "IRON HAND" flights must destroy or suppress the surface to air missiles whilst Combat Air Patrol aircraft circle high above the strike force looking out for enemy aircraft. Finally, the strike aircraft must find and attack the target leaving a hail of small arms and anti-aircraft artillery fire at low level. Individual survival is not the only measure of success, it is the success of the mission as a whole that counts – there is no place for seekers of individual glory.

Enemy aircraft featured are the versatile MIG 17 and the more advanced supersonic MIG 21, capable of out-turning any USAF aircraft.

Flight Of The Intruder takes you into the real world of operational flying and mission planning.

FEATURES

Choose between two of the best aircraft that ever flew. The F-4 Phantom II, fast, powerful and equipped with highly advanced armaments, it is so flexible that it can perform any type of mission. The A-10 Thunderbolt has the first all-weather computer-aided weapons guidance system (TWS) and an outstanding weapons load. Both have stood the test of time and are still in service.

- Up-to-8 friendly and 4 enemy aircraft on screen simultaneously.
- 1 different aircraft accurately simulated, 3 different roles: MIG-29, BOM BARO, or SU-26.
- Realistic mission environment with enemy artificial intelligence.
- Switch between friendly aircraft in flight.
- Carrier take-off and landing with "MIG-29ALL" landing aid.
- In-flight radio messages with radio message spawning system.
- View from all aspects and it is cockpit view.
- Large numbers of mobile targets: including trucks, trains and targets.
- Realistic terrain taken from contemporary operations: maps including Poland, Mongolia and Tibet etc.
- Import "Duckwing" version.

Yes, for the moment! Leicester's new adventure takes us to Monkey Island.

When Predator finds "Big the Amiga" this month, CU takes a look at how far computer games and their creators' past - along with the brighter future.

SPECIALS

110 CODY IS HERE! Well, now! Ed Holmes takes a look at the software - which will be available at the system's launch, and already its potential obvious that its future is extremely bright.

100 A TO Z OF GREATS In the second part of our look back at classic Amiga games, we cover the letters R to Z, and look back at such classics as Rainbow Islands and Zaxxon. It's worth buying, it's here!

114 THE JOY OF STICKS The most important accessory for any games player, the choice of a joystick is going to be one of the most important you'll make. John Minson takes a look at the current batch available and sorts the wheat from the chaff.

A new look at the experience in searching for computer games. Already, the Amiga 1000 takes on early work in the south - are currently under development and stand ready for the system's imminent launch.

6 BUZZ

What's happening, who has signed what, and when to expect it, along with all the gossip and stories that are fit to print - and some that aren't.

26 IN DEVELOPMENT

Our takes on in-depth look at the hottest forthcoming games and eggs a few chicks with the people behind them to get the low-down and an optimum fix.

38 FIRST IMPRESSIONS

More tasty tidbits of games that are just off the drawing board, along with notes and info on their hit potential.

48 SCREAM SCENE

Steve Morley takes a look at Amiga screen nasties - and goes in search of ghouls, fiends, game fiends and zombies. ...

72 ROUND UP

There's not enough space to give every game a big review, so Round Up guarantees that nearly every new Amiga release is reviewed.

76 VALUE FOR MONEY

Peter Meakin takes a look at this month's valuable goods bag of cut-price games and budget offerings, and checks out their value for money.

82 PLAY TO WIN

This month, FTL's Chaos Strikes Back, Apollo's Star Control and a whole host of games are taken head-on to death.

THE DISC

We've done it again.

This month, we are proud to present an exclusive playable demo of U.S. Gold's superb beat 'em up, **Shogun Dancer**. Also, fans of the demo circuit are well catered for with the inclusion of **Madness** - the hottest demo in town.

BUZZ

OFF WITH HIS HEAD!

Highlander 2 will soon be taking the highway onto the Amiga. Several companies are lining up to license the film, which is due to hit cinemas around July.

Ocean currently hold the rights to the first *Highlander* movie, although all they produced was a low grade beat 'em up on the 5 bit machines, however they're still favoured to pick up the sequel.

The original movie centred around a group of immortals who ran rampant in New York and who were hell-bent on cutting off each others heads. The sequel is expected to solve a couple of baffling mysteries: where did the immortals come from and what led them to New York?

Sean Connery will head the all star cast, an amazing achievement bearing in mind his character was decapitated in the first film.

Christopher Lambert will again play Connor MacCloud, the Highlander.

Speculation as to
whose signed

Highlander II...

...Microprose prepares

to take to the skies

once more...

...Dynamic announces

what could be the

ultimate 3D flight sim...

FLYING AGAIN

With *F-16 Stealth Fighter* still flying high in the charts, MicroProse have already announced the follow-up. Called *F117A*, it will feature a new batch of missions, enhanced graphics and improved technical data gained from Pentagon approved releases.

You'll be able to fly over the Middle East, Europe, Northern Japan, The USA and Colombia. It will also be able to facilitate data links, which could contain more missions, extra map data, extra enemies and more weapons.

The *Stealth Fighter* is the most advanced tactical fighter in the world. With its unique design and radiation absorbing paint it's almost invisible to radar. It gave the coalition forces a major tactical advantage during the opening days of the Gulf War.

HUN-EY BUSINESS

Dynamic are currently working on an Amiga version of their smash hit first world war biplane sim, *Red Baron*. Is it you get to fly a selection of 28 German and British fighters over the trenches of war torn Europe.

The graphics will utilize the 3D Space system which has its first outing in *486 Tank Killer*. This system allows an incredible number of shaded polygons to be used without slowing the game down. The Majority of the IPC code will be directly ported across to the Amiga.

although concessions will have to be made in some areas, being to memory and speed restrictions.

A database featuring digitised pictures and a biography of world war one ace is one of many features. As you progress through the game you earn promotions, and eventually you'll lead your own squadron.

A release date has yet to be set, but early next year seems likely.

THE FAMILY WAY

USG have acquired the rights to Francis Ford Coppola's latest blood 'n' pasta epic, *The Godfather Part II*.

Mafia Godfather Michael Corleone, struggles to make respectable his business, while keeping tabs on his lawless nephews' ruthless streak. Al Pacino plays Corleone again, with Andy Garcia as his nephew Vincent. The film builds up slowly in true Coppola style, coming to head in the last half hour with the deaths of a newly-elected Pope, a Bishop and many of the key characters.

USG and are intending to produce both an adventure and arcade version, although the contents of the game has still to be decided.

BATTLE STATIONS

Corn's first simulation is now being developed. AH-356R Battle Hawk is a helicopter sim based in the near future, with ultra hi-tech weapons and equipment. Battle Hawk's programmers are aiming to have one of the fastest sims on the market, and they look like being successful. At the moment the game runs so fast that the helicopter can't out-run its own shadow!

Battle Hawk should be in the shops by October.

SPIRIT OF EXCALIBUR

The death of King Arthur and a featureless Britain is the background to Excalibur, the latest from the Virgin stable. As Last Constantine you must unite Britain and gather allies to save the country from the ravaging Saxon Hordes.

Spirit of Excalibur is programmed by Synergistic Software. The people behind War in Middle East, and should be out in April priced at £29.99.

I Play 3D Soccer will be in the shops around about Easter, priced £24.99.

I PLAY 3D SOCCER

Just as the football season moves into its final stages, a 3D-car sim appears. I Play 3D Soccer from Simulmondo is the second 3D footy game to appear in the last four months, the previous being Microprose's International 3D Soccer Challenge.

Two players can compete in split-screen head-to-head mode. The game can be played in nine different speeds, three goal levels and three difficulty levels.

WING COMMANDER

Despite rumors that Wing Commander would be converted to the Amiga, GU can exclusively reveal that the go-ahead has been given.

Amiga Wing Commander will be a four disk package containing most of the PC features. To avoid excessive disc-swapping the player will be able to skip past some of the cinematic features and get straight into the game, although extra memory will slow down loading time. Out in October.

CHAOS IN ANDROMEDA

On-Line Entertainment, formerly CPL, are currently blustering away on a massive strategy game called Chaos in Andromeda. Set on a chemically polluted planet, your mission is first help Hal, a scientist who can restore the planet's atmosphere. Fly around in clusters of different ships as you battle against alien and heretic gaudies. Expect a review very soon.

SKULL & CROSSBONES

The first release in Demul's new wave of Tengen conversions is to be Skull & Crossbones. SAC is a multi-player team up which made its debut in the arcade ten months ago. Slide plates through many levels in a quest for gold, food, drink and weapons. Rewards include other prizes, magic items and the dreaded Medusa. In the shops from mid-April priced at £24.99.

COVERT OPERATION

More over James Bond, there's a new hero in town. Covert Action from MonProse casts you as the world's number one spy, out to crack drug rings and smash terrorism.

The game is set over three continents and 15 cities and it gives you the chance to hack into computer systems, bug people, tail suspects, bungle and go on stunts.

Covert Action is scheduled for an October release.

MEGAPHOENIX

The arcade classic Phoenix is to be turned into a sequel by Spanish-based Microdigitized Soft. Once more you'll be pitted against hordes of mutant birds who have come to conquer the galaxy.

Improvements will include a two player mode, vertical scrolling, and huge end-of-level bonuses. Extra weapons are also promised to fight off the dreaded Megaphoenixs and its army of photon-egg releasing minions.

Priced £24.99, it's on winging its way into the shops by April.

UNLUCKY FOR SOME

We've all heard what the CIA get up to, but what of their British counterparts? Fear LJ from Virgin places you in head of an organisation whose sole purpose is to preserve national security.

It will be a multi-plotted strategy game which gives you the opportunity to have people assassinated, interrogated and abducted, as well as putting down insurgency and covering up situations which could embarrass the government.

Virgin are asking computer gamers to come up with the plot so there could be a contribution from LJ to theirs. Current mission suggestions include the Iraqi supersonic scandal and trying to give John Major a personality.

Price and release date have yet to be decided.

PUTTING THE BOOT IN

Gremite have 'tackled up' the Shoe People's head their new range of educational products.

Since their creation in 1985, the Shoe People books have sold hundreds of thousands, and the cartoon is now being shown on Russian TV with a regular audience of over 27,000,000. The Shoe People books are very much in the same vein as Roger Hargreaves's Mr Men, with characters such as Tumpy the old fool and Margot the ballerina.

There is currently a huge market for educational software. Classroom Fun School 2 & Thomas combined sales figure of over 400,000, so Gremite might not be the only software house looking to cash in on this lucrative area.

The first of Gremite's educational packs should be available this summer. Watch this space - through the square window...

PAPER CHASE

Five years after its first outing in the arcades, Paperboy is about to have a follow-up. Paperboy 2 will be produced by Mindscape rather than Elite, the company who held the rights to the original.

The game will centre around the further antics of the paper throwing, BMX

riding, delivery boy. Still in its planning stage, it seems unlikely that the basic game will be radically changed. The object remains to correctly deliver as many papers as possible while avoiding hazards such as remote control buggies and cars.

THE NORSEMEN COMETH

From Sheffield-based Cam Design, plus an ex-member of the Sullivan Bath team, comes Heimdal, a Viking game set to turn Norse legend upside down.

Heimdal is a son of the gods. He was a normal kid until one day his dad dragged him off to the local pub, got a few drinks down him and sent him on a quest. His first task is to cut a girl free who is pinned by her hair to the pub wall. This is done by throwing past to cut her hair free but, if you miss, her hair gets closer in two... although this little 'paper' is likely to be tossed down in the first version.

Later on, Heimdal has to prove himself to the gods by travelling the world in search of various attacks.

So far, the development notes and sketches show this a large brief case. We think this is going to be big, so look out for an 88

BUZZ

GODS ALMIGHTY

If you couldn't make sense of our Gods review last month, don't worry. Neither could we! Unfortunately, much of the original text was lost during the production of the mag and Dan Slingsby, who wrote the piece, hasn't stopped sulking all month.

Gods scored a massive 93%, and a CU Superstar in last month's issue and we haven't stopped playing it ever since. One of it's most interesting features is an in-built monitoring system. This monitor's a player's health, score, and the time taken to reach certain points in the game. If he's performing badly, lost most of his lives, got few points, little energy or is making slow progress, the program adjusts to the player's ability and makes life easier by taking out some of the attack waves. (By playing well, extra treasure chests can be collected and secret passages revealed) - there's always something new to discover.

CU would like to apologise to both the Bitmap Brothers and Panegyral for this mistake - sorry lads. We'll have an extra-special playing guide to Gods next issue, look out for it!

JOB OFFER

CU Amiga is all set to maintain its brilliant games sections while expanding its coverage of hardware, peripherals, sound, graphics, business and utility packages.

We are on the look out for top quality contributors and a full-time staff member to help us with these changes. Good rates of pay will apply for the best candidates.

Fainthearts need not apply, but write in if:

- A) you are bursting with ideas
- B) you have no trouble writing interesting, entertaining copy about machine code, hard-lead scanners, printers etc
- C) you're unafraid to bring a fresh approach to these subjects, can spot a deadline and act on it.

Quick Xpress experience is preferred for the staff position, training can be given. ITV's and usual benefits apply.

Please write to Steve Jones, the Editor, CU Amiga, Image Images, Priory Court, 30-33 Farringdon Lane, London EC4A 3AU. All applications in writing, please, but if you need more details ring Steve Jones on 071 331 4312.

SURPRISE, SUR-PRIZE!

Our open-invited screenshot competition has been our most popular compo yet, and here, for the benefit of our overseas readers and anyone patient enough to contain their excitement for a month, are the details of what was on the end of our increasingly popular photothon...

0000 520543 - Contacting this line means that you have won one of our 200 free games!

0020 580071 - Congratulations, you've won a 10% off one of the listed Ocean games.

0020 580072 - Getting through to this means that you've won a free off a U.S. Gold game from the printed list.

0020 580073 - It's discount city, with a free off one of the listed Microprose games.

Incidentally, if you have forgotten what the games on offer were, here's a brief re-cap:

Ocean: Special Criminal Investigations (C24.95), Narc (C24.95), Robotrap II (C24.95), The Hollywood Collection (compilation C24.95), Battle Command (C24.95), and Pang (C24.95). To claim your discount, enclose your screenshot and please send a cheque for the remaining amount made out to Ocean Software and addressed to Ocean/Cu Office, 8 Central Street, Manchester, M2 5HS.

U.S. Gold: Rightshift (C24.95), Line Of Fire (C24.95), Chips Challenge (C24.95), Machine (C24.95), and Consequence (C24.95). To claim your discount, please enclose your screenshot and send a cheque for the remainder to U.S. Gold/CU Amiga Office, Units 2-3, Holford Way, Birmingham, B5 7AA, making the cheque payable to U.S. Gold.

Microprose: 3D Soccer (C24.95), Midwinter (C29.95), M1 Tank Platoon (C29.95), Simulacra (C24.95), Risk II (C24.95), and F-16 (C29.95). Once again, enclose a cheque for the outstanding amount and your winning screenshot and send to: Microprose/CU Amiga Office, Unit 1, Hampton Road Industrial Estate, Tetbury, Gloucester, GL8 5JA.

Finally, anyone who has won a free game, then send your card into our usual address, marked CU Free Game Offer, and we'll organise your chosen game from the above list.

BASED ON
MEGATRAVELLER
BY GAME DESIGNERS'
WORKSHOP, THE WORLD'S
MOST POPULAR SCIENCE
FICTION GAMING SYSTEM

VERSATILITY

The most sophisticated character
generation system ever devised: five
military classes, more than 70 talents
and abilities. Allows player to control
character development through 8 services:
Army, Navy, Marines, Merchants and Scouts.

... Now with
the help of corrupt
Imperium officials the
Zhodani and the Outward
Coalition are
planning a rift.
Smuggling arms to
traitorous groups within Imperium borders the
Zhodani are planning to strike from within.

IMAGINATION

Flexible gaming
system supports any
playing strategy and
allows multiple
solutions to problems
and obstacles.

FIREPOWER

Realistic, combat sequences let
you control each of your
characters individually, while
still giving general combat
orders to the other members of
your party. Utilize more than 30
weapons and skills in this
advanced combat system.

72 varied skills to learn
and use including
medical, piloting,
communications, laser
weapons, bribery,
demonitions and handgun.

COURAGE

28 planets and
satellites to explore in
8 systems filled
with exciting puzzles,
dangerous subplots
and interesting
characters to
encounter.

"Megatraveller I, a game
that truly warrants the highest
level of praise, the attention to
detail makes it exceptional"

RESOURCEFULNESS

Saving the universe costs money:
a detailed bartering system lets players
earn Imperial
credits
through
interplanetary
trading, with
30 types of
cargo.

Supports Jet Set Motor Cars and
hard board for virtual tactical
maneuvers, digital space
and planetary simulations.

"Megatraveller I is one of the finest role-
playing computer games in at least the
last three or four years."

"Megatraveller I is one of the best
science fiction role-playing games ever
for the computer."

BACKCHAT

LETTER OF THE MONTH WAR GAMES

Thanks for producing a brilliant magazine which new gamers for most, if not all, Amiga users.

Reading your February edition prompted me to write to you. I am still getting the magazine from my wife, through the post, even though I am a soldier presently serving in the Persian Gulf.

It was Mr C Howe of Reading's letter that prompted me to write as he commented on the disappointing games on the market during the Christmas period. I agree totally with him, but now looking through your February edition it seems that most of software houses have missed the boat and are now making up for it. *Exterminator*, *Turkmen 2*, *Saints*, *Nano*, *Speedball 2*, *Learnings* and *Chaos Strikes Back* all scored over 90%. Surely this must be a first!

Maybe the software houses forgot Christmas this year but decided to make it a happy new year for all Amiga owners. As for me it seems that I have a lot of catching up to do when I get back.

All I can say is that 1991 is going to be an excellent year for the Amiga games players and I hope the software houses keep it up.

Cpt R. A Smith, Somewhere in the Gulf.

Thanks for writing Corporal Smith. Now that the Gulf War is over, you're certainly going to have to do a lot of catching up on all the great releases of the last few months. To help you one way, we've had a delve into our software boxes and sorted out a pile of recent releases for you to enjoy.

THIS IS THE END

I'm fed up with games that have amazing intro but abysmal and sequenent. Take *Shadow of the Beast 2*, for example: great intro, superb graphics, fantastic game, but when it's completed there's a terribly tedious end sequence. It really annoys me when I've spent months trying to complete a game to be rewarded with a crappy graphic or substandard animation. Of course, software houses, come up with something better than this!

Youghal Station, Atherstone.

To be fair to the software houses, end sequences of games are seen by only a small minority of players as most people never bother to play a game all the way through or are too hampered to get very far. It's all very well having nice animation sequences but it eats up memory which could otherwise be used to improve the actual game and add extra features. I do

sympathise though - I recently completed *Golden Axe* by defeating Death Adder and rescuing the two prisoners only to be greeted with "The End" written over the Map Screen. That was very disappointing after such a great game.

SOFT OPTION

In reply to Nigel Howell's letter, I must recommend 'Mail-Centa' (the actual ship is known as 'Compass-Centa') in Belper, Derby. I am, of course, commenting on the mail order side of the shop, as I have never actually been to the place. In all my almost years of using computers, I've never come across a shop that offers as good and fast service as Mail-Centa. There's also very cheap, which is another good reason for recommending them.

As for John Tringey's letter, I can recommend one PC company that stands head and shoulders above every one else. HGS, based in the Isle of Wight, offer an excel-

lent service. Ever since I have had my Amiga, I have been buying PC disks from various places - but none have offered the very fast, competent service I get from HGS. Not only that, but they were one of the very first companies to offer online BBS access!

Finally, may I just add how much I enjoy the 'Demos' section in the mag (better than any other Amiga mag) and the 'Additional' section (very useful). To,

Mark Freeman, St Albans.

If any of our readers might like to investigate further, Mail-Centa can be contacted on 0773 865550 and HGS on 0963 529584.

COVER UP

In the February issue there was a letter about playable demos versus complete games on your coverdisk. Why don't you alternate between the two, with demos one month and a game the next etc.

Recently, obviously, reader Bill me which are the best budget martial art games on the Amiga, apart from *DO-1*.

Mark Rodgers, Kent.

DOISN'T ADD UP

I am a great fan of CJU and have been for some years now. I bought your magazine when I wasn't registered owner of an Amiga, I have been very impressed with your new layout, and I love playing the cover disks.

My only quibble is your new 'Additional' section which is great, but a lot of the stuff you review gets repeated quite regularly which is a bit of a disappointment for regular readers. Could you send them stuff like that?

Corinna Probert, Amersham, Ireland.

Additional is now written by Chris Jenkins, who's worked on other mags (Sinclair User and ACE), and knows the Amiga inside

WRITE TO CU, 35-37 FARRINGTON LANE, LONDON, EC6A 3AU

out. He'll be covering new products each and every month so keep reading.

CIRCUS TRICKS

I'm writing because I disagree with Tony Collins' review of Monty Python's Flying Circus in the September issue. How can you give a radical and original game like Monty Python an overall score of only 7/10? It deserves to be 10 through 100, or 100. What could be more fun than shooting Monty Python with a shooting stick instead of your foot?

Benny Beaman, Australia.

Ern, how about watching staff write. Mark Patterson offered to drink his 10th anniversary gagging off down his jumper or Tom Gresham attempting to tell a joke?

TIME FOR A CHANGE?

Today's magazine, especially since the reforms, when some new sections were brought in like First Impressions, and the mag is good for people who love games. However, I am quite interested in tech games and programming, as in the majority of Amiga owners I know I think you'd be proud if you dedicated at least one page to programming. Just give it a go. It's a bit in the AMIGOS book but a simple game or something. This, I am sure, wouldn't take up much time and would be extremely well received.

Clare Reed, London.

Yes, tech is not confined. Looked in response to the many requests from our readers for such a feature, we'll be starting a series of articles on programming for the Amiga (a few readers like what others, we'll also be running reviews on utility packages, peripherals, hardware applications of other goodies besides.

How are we going to do this without stuffing back our games coverage? Simple, we're going to add lots more pages. More than that I'm not going to say. Keep reading.

QUICK QUIZ

Regular reader, S. H. Hardy, has come up with a little quiz for CU readers. It's quite tough so for the first reader to find all 15 correct solutions will win a whopping £250 of free software.

1. What Came From The Desert?
2. Which Speedball 2 team had to be the worst the entire history of Football?
3. Who created the Battleships series?
4. Before an Amiga can be plugged into an ordinary television, which device is needed?
5. What is the name of Ingrid's pet dog?
6. Name the 4 heroes of Gauntlet.
7. Who is the green frog-like hero of Nebulus?
8. What is the sequel to X-Out?
9. Danusia's Wings of Fury features which WW2 American Aircraft carrier?
10. Rick Dangerous has been based on which 2 movie characters?
11. Where is Eye of Harat set?
12. How many Powermenger levels are there?
13. Where did Heidi originate?
14. Which enemy are you working against in Carthage?
15. What is the name for the landscape-effect used effectively in such games as Duper, Total Eclipse and Dark Area?
16. Who is ship in love with?
17. In MUOS, what is used as a ball?
18. Sam City is played by which famous B-movie monster?
19. Name all the body games and editors which have been written by Dito Dini for Amiga?

Stuart Whitley, Sheffield.

READERS' REVIEW

Have you ever read one of our reviews and totally disagreed with what we've said? If so, this is where you can voice your opinions and stick up for your favourite games. If you do, you could win yourself a £25 game, so get scribbling to us at Backchat!

FIGHTING TALK

How on earth can Mark Patterson give F-16 Stealth Fighters CU 5/10 and call it a truly excellent simulation? Is he mad?

> Mark's review wasn't critical enough. The game updates at twelve frames a second on average, sometimes sinking to a lovely seven! This makes the graphics look everything but fast and smooth. Just take a look at HMM3. There you'll encounter fast and smooth graphics.

The sound is rubbish. Okay, you didn't give it as much as the other ratings, but 7/10 per cent? That's one of the things I don't like with your reviews. When something is very bad, you don't give it what it really should have. You just drop it 10-15 per cent below the other ratings. As for the testability and playability scores - these were completely bogus. I have yet to find a single review in your mag that has big differences between these two ratings. To get into the game you have to wade through an enormous manual and learn to use all the varied key commands. The playability should have been much lower than the testability rating.

The fact that the game takes an age to load, doesn't use two drives, and that the disk change is clumsy doesn't help matters. There's even an awful intro-picture with some boring music.

One of the game should have scored a meagre 7/10!

Eric Auld, Sonney.

Mark replies: We're going to have to agree to disagree over the relative merits of F-16. I'm a great fan of flight sims and this game, in my opinion, is one of the best. Of course, it's going to take a while to get into the game. It's a very complex sim, but with a little perseverance you'll be amply rewarded.

THE TOP FIVE

Here's this month's readers' top five Amiga games. Don't forget to vote for your faves each month. There's a software prize for one lucky reader each month. This issue's prize was won by Stuart Johnson, Huddersfield.

- 1 Speedball 2
- 2 Turrican 2
- 3 Powermenger
- 4 Lemmings
- 5 Robocop 2

KICK OFF 2

A NEW DIMENSION SOCCER SIMULATION

- BLISTERING PACE
- PIXEL PERFECT PASSING
- SUPERB TACTICAL GAMEPLAY

KICK OFF 2 greatly enhances the gameplay of KICK OFF, winner of the THE GAME OF THE YEAR in the U.K., and similar awards right across Europe. A host of new features have been added to the ones that enthralled players the world over.

- Full size multi-directional scrolling pitch with the players, markings etc. in correct proportion.
- 1 to 4 players option. (Amiga and ST only)
- 2 players TEAM option against the computer or 2 other players. Hundreds of players, each with a unique combination of attributes (strength, pace, etc.) and skills (passing, shooting, tackling, etc.)
- Interactive Kick Off joystick controls to dribble, pass, shoot, head or chip the ball and do sliding tackles.
- Set piece FREE KICKS including dumfries and the ability to dip the ball or bend the ball round a defensive wall.
- 9 types of corner kicks with full control of shot power, long and short throw ins.
- Team selection from a squad of 18 with substitution and a referee of tactics.
- League and cup competitions with Extra Time, Injury Time and sudden death penalty shoot outs.
- Facility to view, edit and save the Action Replays and create a Golden Shots disc (Amiga, IBM & CRM 64)
- Facility to load Player Manager teams and tactics for a single or league game.
- Red and yellow cards, 18 different referees, injury time and a host of features to create an atmosphere for a game which is real fun to play.

ST ACTION - The best game ever to grace the ST. Highest accolades I can give.

AMIGA USER INT. - The best desktop game ever. 95%

THE ONE - Ultimate soccer simulation. 98%

THE AGE - Ireland. Ray. Big game 93%

AMIGA GAMERS - Best desktop game to have appeared on any machine. 98%

ST FORMAT - What a great game to play. 90%

ST NEWS - Championship winning strategy. 95%

GAMES MAGAZINE - Probably the best sports game ever. 92%

COMMODORE USER - The other best game ever made is 90%

AMIGA ACTION - Surpasses all other football games. 93%

POPULAR COMPUTING WEEKLY - Nothing short of brilliant.

THE COMPUTER EXPRESS - Computer football game of the year.

AMIGA & ST £19.99 **ESP. AMIGA £24.99**
IBM AT & ST Turbo, VGA & VGA £24.99
CRM 64 - SPECTRUM - AMSTRAD £9.99, £14.99

An International class player takes charge of a third division club as Player Manager. His brief is simple - Bring Back The Glory Days.

His success depends on his playing skills on the pitch and managerial skills in devising winning tactics, scouting the right players from the transfer market and building a team worthy of the highest honours.

- Unique facility to design and implement your own tactics.
- Over 1000 individual players, each with a unique combination of attributes and skills.
- A lively transfer market. Haggle for the best deal.
- 4 division league and a cup tournament with sudden death penalty shoot out.

The Player Manager brings the every day realities of a manager's life, his talents as a manager and a player, his intuition and his instincts into a sharp FOCUS.

ST ACTION - A tribute to your genius.

THE ONE - An exceptional football management simulation, featuring depth, slow tactics, strategy and playability.

THE AGE - Incredibly tricky challenging soccer management with tactics and financial inside action. 92%

NEW COMPUTER STRATEGIST - The sheer depth is incredible. A brilliant management game.

COMMODORE USER - At last a management game that requires

real management skills - a tribute. 94%

ST FORMAT - Irrating. 93%

AMIGA FORMAT - Inspiring and addictive. 90%

ESAP - Best football management game ever written. 92%

AMIGA - ST £19.99

ANC

3 DIMENSION IN SIMULATIONS

THE FINAL WHISTLE

Amiga - ST £12.99

Raises the skills required and gameplay of KICK OFF 2 to new heights.

Two extra bits.

Look at any player stats, attributes and skill before selecting squad.

Totally new corner kicks with full control of the power, height and trajectory of the ball.

Enhanced throw ins and penalty shots.

Provides to kick the ball in the air and do a blinding header or a spectacular overhead kick.

New two players team mode. Player 1 in position nearest to the ball and player 2 in position or keeper.

Lineups and referee on the pitch. (ESP: Amiga Only)

A new playing attribute FLAIR. A player with a high level of flair will try a solo attempt at the goal.

A new pitches - Wembley - Wigan - Middles - New League

And lastly more

WINNING TACTICS (£6.99 - Amiga) - A collection of tactics for use in Player Manager or KICK OFF with full explanations.

RETURN TO EUROPE (£9.99 - Amiga) - Three European cup competitions. UEFA Cup - European Cup - Cup Winners Cup.

GIANTS OF EUROPE (Amiga) - Best teams of Europe on one disc.

SUPER LEAGUE - Four division league with 24 teams in each division. Automatic promotions and relegations. Teams from GIANTS OF EUROPE can be loaded into 1st Division.

BEAUTIFULLY COMPACT...

Commodore's Amiga-based CD entertainment system, CDTV, promises to bring the fabled interactive movie one stage closer to reality. Rik Haynes takes a look at some CDTV games in development. . . .

Price paid peeing: With Commodore's release the CDTV for £299! First out in next month's issue of *SA* Amiga. . .

The CD version of Battle Chess has improved graphics, sound and gameplay (the Turbo version shown). . . .

The original Battle Chess from Interplay in California mixed the classic board game with some of the best three-dimensional graphics yet seen on the Amiga. When its fantasy medieval chess pieces attacked each other, their one-on-one battles were played out in entertaining animation sequences.

The pending CDTV version promises even more.

"The 35 minute tutorial is a major enhancement," says Troy Wornel, producer of Battle Chess CD at Interplay. This innovative show combines over 8000 frames of animation, text, digitized speech and an original professionally composed music score to create a mini-movie for console-seers of chess. The tutorial details the history and rules of chess and introduces each piece to you, in turn. It's a great way to learn about this ancient strategy board game. The text was researched by a script writer who normally works on movies, television situation comedy shows and comic books. Did you know the Queen couldn't move around the board?

Battle Chess CD also incorporates a new and improved interface, animated graphics, sound effects and background scores. It contains 10MBs of graphics compared to the 4MBs found in the original. All the gameplay features from the original are still included such as 10 levels of play, an opening library of 30,000 moves and the chance to play against the computer or a friend. It will take four months to produce, David

Stetten is programming the conversion and Charles Wiedeman III is drawing the tutorial artwork.

"We're currently improving the combat animations of the original Amiga version of Battle Chess, but we don't have all the details yet as to which ones will find their way in," claims Wornel.

Troy and the gang are going back to rework some of the combat sequences, and they hope to inject more humour into these short bursts of battle. For instance,

Interplay wants some of the knights to be on horseback. Eventually there will be six different audio and 35 combat sequences.

New digitized stereo sound effects have been added and roughly 30 minutes of CD-quality audio are included. Five different music scores change during the game depending on how well you are playing. It's up-beat when you're winning. Almost a funeral march when you're losing. Wornel confesses, "A small local band from Santa Anita went into the studios to record these tunes. Synthesizers did a majority of the work. For the tutorial, Interplay used six professional actors to record the speech spoken by each chess piece. This digitized discourse may be converted over to other languages in the future. The pumped sound effects are either home grown or come from the compact discs from Sound Ideas in the States. The original FX had to be trimmed down to take up less space on the floppy disk, so the audio has to be re-digitized to bring up the quality on the CD version."

Brian Fargo, President of Interplay, attributes the company's success to a talented team of programmers, artists and professionals who spend many painstaking hours on the design, production and quality assurance of each individual game. "We converted Battle Chess because it's a mass market, universal game that uses the power of the CDTV to its fullest," states Worrell. Since it was founded in 1982, Interplay has produced many Amiga games including *Tass Times in Two Towers*, the *Barbarian* series and *Neuromancer*.

Interplay feels that CDTV is on the cutting edge of new technology. The feel that it is going to be the first in the market place should help it tremendously. Interplay's premier CDTV product will be available in the spring, no price has been set. *Battle Chess* will be the first of many CDTV titles from Interplay, so watch this space.

CD-TV

Welcome to the world's first column devoted to the CDTV. Over the coming months *CU Amiga* will introduce you to the concepts of multi-media, full motion video, cyber comics, interactive image banks and digital doctors. The hyper hits will be perpetual. If you have any questions or comments you can contact me by writing to **Rik Rianeri, CU Amiga, IBM/Amiga Images, Polary Court, 35-37 Farrington Lane, London EC1R 3AA.**

lead! The Hound of the Baskervilles. I say, can you solve this case of the mysterious CDTV? It's brilliance is elementary my dear Holmes. ...

Women in Motion from On-Line Entertainment has nearly 100mb of realistic pictures. The focus of CDTV means that Softward Maybridge's celebrated males will be animated for the first time in their history. The package will be able to accept CPPlus files, claim its makers, and it will be the largest in the (semi)professional sector. ...

CDTV BEATING FROM ON LINE

On-Line Entertainment will have three CDTV titles, each priced at £29.99, ready for launch next month thanks to its versatile DUNE authoring software.

Based around Sir Arthur Conan Doyle's classic detective novel, *The Hound of the Baskervilles* is an interactive investigation filled with journals, newspaper cuttings,

On-Line Entertainment uses the DUNE system to produce CDTV titles such as *The Hound of the Baskervilles* and *Psychobiter*. ...

NEW WAVE WONDER

Commodore

Dynamic Total Vision is set for a country-wide "Blooms" debut next month.

(although we'll believe it when we see it). The giant electronics retailer has agreed to stock the CDTV in over 100 stores around Britain. Although the launch price was to have been £399, Commodore have announced a cut down price of £369.

The first stocks should be selling by mid-March.

Additionally, Commodore was showing an add-on CD-ROM drive at the Winter Consumer Electronics Show in Las Vegas last month. The A600 effectively turns existing 10M Amiga's into CDTV's. The price expected to be between £280 and £350.

Program to meet Psychobiter - will this release from On-Line Entertainment be the first computer movie to be turned into a game? Shot on location around their offices, it has taken the On-Line crew, headed by Project Melted, around six months to edit this CDTV release. Psychobiter will be one of three CDTV releases from On-Line. ...

telegrams, letters, police reports and other clues. On-Line says the massive capabilities of the CDTV - digitised sound, images and animation - are used to provide an atmosphere heavily laden with suspense and drama.

Women in Motion is the first time the historic photographic images of Frederick Maybridge have been brought together in a 'Moving' -

BEAUTIFULLY COMPACT...

— **Film.** With nearly 100MB of graphics, this product gives a unique insight into the moving form. These pictures have been used by great animators, including Disney, as a basis for their work in the past. According to Co-Line, artists will be able to use paint packages like *DeluxePaint* to add and play around with these 'art' images, all without making, sitting and dancing in the nude. The first version will include narration by a well-known BBC announcer.

One day last year, Penguin Mitchell and a group of friends travelled to the local countryside and shot an off-the-wall short movie using a normal camcorder. It took them over six months to make this video into a fully interactive adventure for the CDTV. *Psycho Killer* is the result. Who knows? Jeremy Beadle may do the same thing with those embarrassing home-video clips from 'You've Been Framed'.

Tiger Media employs cartoon graphics rather than digitised graphics in its CDTV products.

Commander's new machine will be perfect for the animation enthusiast allowing for more detail and more space devoted to samples. The case of the *Continous Commander* will be the first in a series of new adventures for the CDTV.

Set in the 1950s, this screen adventure from Tiger Media features a plane inspired by Howard Hughes' 'Spruce Goose'...

PUT IN THE PICTURE

"CDTV is the next logical step in the evolution of consumer electronics," says Nolan Bushnell, general manager of Commodore's Interactive Consumer Products division in North America. "It provides capabilities far beyond any currently available entertainment or computer system, yet is remarkably simple to use. If you know how to change TV channels with a remote control, you can take full advantage of CDTV." Bushnell was co-founder of Atari, but we won't hold that against him. "The concept that drives CDTV is that of an electronic interactive, instantaneously accessible library. We will have fiction, non-fiction, reference and entertainment titles that provide consumers with a truly unique source of information and entertainment."

THE CASE OF THE CLOUTIER CONDORE

Voiced 'Best Hit Software' by Japan's leading games magazine, *Condor* from Tiger Media is a 1950s-style murder mystery drama which uses vintage comic-book cartoon-style characters and tones.

"*Condor* is the first title to be developed specifically with the interactive capability of optical disc platforms in mind," says Laura Buddin, President of Tiger Media. The LA-based company has been at the cutting edge of CD development for the past five years. *Condor* is the first 'Ainawa Adventure', a full-line of interactive titles to be developed by Tiger Media in the coming months. *Ainawa Adventure* takes place aboard the *Condor*, a luxury airliner fashioned after Howard Hughes' 'Spruce

Goose'. There has been a murder, all the suspects are aboard the plane and the player has 90 minutes to find the murderer. Using the CDTV's remote control, the player moves the detective from room to room, meeting the characters on the plane and gathering clues. Each segment lasts about two minutes, during which time the detective tries to establish the means, motive and opportunity for each character. There are more than 1500 paths that a player can follow, however, only one leads to the murderer.

"This title is 100 times larger in data and graphic capacity than any other title ever produced for any format," claims Tiger Media. "There are three hours of CD-Audio, more than 700 originally drawn colour pictures and 26000 of graphics."

THE POWER

From the number 1 hit single, comes the number 1 game for your computer... Meet Max and Min, two rubbery little footballs whose love has been blown apart! Help bring them together by guiding Max through 100 brain-busting levels of mazes, puzzles, logic and fun.

The game includes two modes of play plus a unique head-to-head feature, a construction kit (for unlimited fun), super sound and graphics, and of course that bass-thumping number 1 track!

Have you got what it takes?

If you have enjoyed reading this issue of CU AMIGA, you are bound to be interested in our fantastic new subscriptions offer. The offer aims to give you value for money, an easy way to regularly receive your favourite magazine, and - thanks to our friends at

IMAGE WORKS - a FREE software gift

Subscribing to CU AMIGA for only £29.95 has so many benefits for the self respecting enthusiast of computer entertainment. Here are a few points to consider whilst pondering this small but worthwhile investment:

SUBSCRIBE TO CU AND G

• Get 12 issues of CU AMIGA, the ultimate games guide to the ultimate computer, delivered direct to your door and we'll pay the postage! This means never having to traipse down to your local newsgents for your copy again.

• Ensure you never miss out on all the vital information which only CU AMIGA gives you and impress your friends with it!

• Choose from some red hot Image Work's games - which can be yours absolutely FREE!

• Save yourself between £19 and £25

SUBS RATES SUMMARY

12 issues (UK Residents only)	£29.95
12 issues (All Europe)	£39.95
12 issues (Rest Of The World)	£59.95
24 issues (UK Residents only)	£57.90
24 issues (All Europe)	£105.90
24 issues (Rest Of The World)	£125.90

We suggest that overseas readers pay by International Money Order.

Place your order by completing the coupon, or send your details on a postcard, or ring our special 24 Hour Orderline Service on 0800 420 088.

Subs Guarantee: If you aren't completely satisfied with your subscription, you may cancel it at any time and receive a partial refund for all unexpired issues.

GET FREE SOFTWARE!!

If you take out a subscription for 12 issues (only £29.95) or 24 issues (only £57.50) you can choose one of the following Image Works games free!

- Wings • Falcon • Falcon Mission Disk 1
- Falcon Mission Disk 2 • Battlemaster
- Back To The Future 2 • Cadaver • Dungeon Master

Or two games from those offered below:

- Xenon 2 • Interphase • Speedball • Gravity
- Flip It & Magnose • Final Battle

(NB: The free software offer is available to UK residents only.)

Your software choice will be mailed separately to your first magazine, please allow 28 days for delivery.

CU AMIGA

External and cockpit views can be used to visually identify planes. There's nothing to stop you shooting down one of your own fighters.

The HUD displays information such as air-speed, altitude, currently selected weapons and heading. It's also used to select enemy air and ground targets.

With MicroProse's sim set for take-off, Mark 'Fly Me' Patterson flew in for a look.

With *F-15 II* nearing the final stages of development it looks as if MicroProse are steering away from the thoughtful approach of their previous products by stepping up the action.

The game is orientated towards individual missions rather than an overall scenario. You start as lonely a Flight Lieutenant aiming to collect ranks and medals while battling hostile forces. It's the usual MicroProse formula which is rapidly heading towards over-use.

IMPROVEMENTS Although MicroProse are attempting to improve on the PC version some features may have to be cut owing to memory restrictions. To compensate for this the presentation screens have all been touched up or completely redesigned. The sound-effects are also being rewritten from scratch.

F-15 II

Rather than port the graphics code over from the PC version, the programmers are handwriting routines from *F15*. The number of polygons, their size and position are all relevant to the game's speed; if the screen's too cluttered the frame rate tends to slow down. *F15*'s programmers believe the finished product will run any slower than ten frames a second—unimpressive claim.

People with extra memory will be able to access addi-

tional features such as digitised speech and possibly some enhanced graphics, but the inclusion of these depends on the time remaining after the main bulk of the game is completed. The game is also being designed to run faster on modified Amigas, a fact which will please A3000 owners.

LOOKING The cockpit is also being redesigned, to make it look and work more like that in the arcade ver-

sion. Although MicroProse claim that all they've really 'borrowed' from the coin-op is get the distinct impression that Amiga *F15 II* leans far more towards a thinking man's conversion of its arcade brother rather than the PC sim.

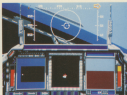

As with *F15*, MicroProse's last flight sim, custom built software is being used to design the graphics. These are intended to let the user draw in three dimensions, in a similar principle to a CAD

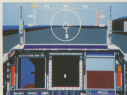

Hi-resolution presentation screens will be used to link scenarios.

Choose from a small arsenal of air-to-air and air-to-ground weapons.

One of the problems the programmers had to overcome was making the horizon sit when the cockpit pans. They had original input with the idea of creating a river cockpit with no slants.

The arrow at the top of the HUD points the way to your first target. A mission always contains a primary and secondary target. Both must be engaged unless your orders say otherwise.

A successful mission will earn the pilot promotion and commendations. Outstanding performance, such as a long time without being hit, can result in the Congressional Medal of Honor, the U.S.'s highest award.

REACH FOR THE SKIES

The F15's primary role is as an air superiority fighter, designed to dominate the air, allowing friendly aircraft to operate unopposed. It is also an extremely capable strike aircraft, a feature which prompted the USAF to develop the F15 Strike Eagle, a purpose built ground attack version of the normal F15. It's capable of a maximum speed of over Mach 2.5, making it one of the fastest attack planes in the world. For two years it held every title to indicate (the speed at which a plane climbs) record. During the Gulf war one Saudi piloted F15 downed two French built Mirage fighters and one off a Russian made SAM reactor when they tried a sneak attack on the American support in Kuwait.

Death is the end. Your plane can withstand hits from enemy anti-aircraft fire and even some surface-to-air missiles. Spending will save you provided you're not flying too low.

machine. In order to conserve memory some of the features of the PC version may have to be dropped.

Features Missions will include destroying oil fields, intercepting enemy fighter squadrons and long range interdictor strikes. Unlike most other flight simulations you won't get a choice of weapons. Your F15 will come equipped with two types of air-to-air missiles plus air-to-ground Mavericks, only the amount is selectable.

The game is set in six different locations. Libya's infamous 'Line of Death',

Enemy tracking devices range from a pair of binoculars to state-of-the-art radar equipment. It pays to watch the skies.

Vietnam, Middle East, Persian Gulf, North Cape and Central Europe during World War Three. Mission objectives will be dictated by the current location, for instance supply lines and ammo dumps have to be attacked in the world war scenario. Despite the Gulf War,

MicroProse have decided not to alter the Persian scenario, so you're taking off from air bases in Kuwait to attack targets in Iran. Unlike F15 the onus is on action rather than strategy.

F15 is scheduled for a May release. Full review next issue.

When it comes to cute coin-ops, there's no doubting that they offer unrivalled playability. After years of alien blasting and power pill gobbling, Taito delivered the shot in the arm that the coin-op scene needed with *Bubble Bobble* and its many sequels. Since then, cutey games have almost become a genre in their own right with games ranging from *Alpinia*, *Hades* and *Flood* literally flooding (sorry!) the market. More importantly, they also have the advantage of surviving the transition from coin-op to the Amiga with very little harm, a fact Ocean themselves have proved with the likes of *Rainbow Islands*, *New Zealand Story* and *Pang*.

The licence to convert Taito's relatively unknown *Bubble Bobble* was acquired

Following the success of their conversions of such cute coin-ops as *Rainbow Islands* and *Pang*, Ocean jump on to the bandwagon again, this time with a conversion of *Snow Bros*. Steve Merrett chills out and takes an early peek.

SNOW BROTHERS

(Left) The mid-level guardians appear after every ten screens, separating courtyards and deadly structures; the smaller creatures should be killed up and rolled back on the massive guardian until they eventually lose over and die.

after last year's ECEB in September, and Ocean France were drafted to convert the game immediately. Since past success with the likes of *Catal* and *Pang*, OF have been in the lucky position of more or less selecting which licenses to convert. On signing the rights to *Snow Bros*, OF's graphic artists took a look at the coin-up to make a note of key items and sprite animations. The game's programmer then took notes on specific routines that may cause problems. From these initial impressions, any problems could then be ironed out very early in the game's development and the recreation of the sprites can run in parallel.

MOVING ON The basic gameplay of *Snow Bros* is akin to that of Taito's above-mentioned *Bubble Bobble*, in so much that the game involves clearing 50 separate screens of their deadly occupants. However, replacing the cute *Brontosaurs* of the bubble-blowing classic, *Snow Bros* stars a small snowman as its central character, and the icy hero is armed with a magic power which enables him to turn the attacking creatures into massive balls of snow. Each monster requires four direct hits before he is completely covered in snow and effectively disabled, and it can then be killed simply by pushing it across the screen until it builds up speed and cannons into the wall, killing anything in its path. However, if a snow-covered monster is left for too long, it rapidly escapes its confines and starts to roam the platform-laden screen at a faster pace. To your advantage, though,

are a number of bonus goodies and potions which, when collected, enable the little snowman with a variety of super powers.

When ten screens have been cleared of their occupants, the little snowman comes up against a massive mid-game guardian. These get progressively harder as the game progresses, and again cut literally hundreds of smaller creatures which must be avoided as you attempt to kill the larger opponents. In addition, in keeping with the bonus idea of *Rainbow Islands* and *Bubble Bobble*, *Snow Bros* contains dozens of small bonus objects which are accessed by performing certain tasks or completing a screen in a specific order. Ocean France have managed to iron all of the original's secrets, ensuring that the conversion is as close to its arcade parent as possible.

SNOW JOB Perhaps surprisingly in these days of DOS systems and PC work stations, the game is being written on an Amiga-based system by Pierre Adams who took up his *Snow Bros* duties

Special potions can be collected when two or more others are dispatched at the same time. These items allow the snowman to upgrade the speed of his shots, along with their distance, and he can also attain temporary invulnerability.

SNOW BROTHERS

as soon as his commitment to Pang was completed. Meanwhile, the impressive graphics are being prepared by Philippe and Lionel Coussel (two brothers who have now been dubbed 'The Snow Bros') along with Francis Faumier, who, using a simple ST set-up for the maps and sprite editors, have managed to recreate the entire 32-colour palette to make the game's screens look virtually identical to those of the coin-op. In addition, by creating each of the game's 50 stages in almost jigsaw fashion, a lot of memory is saved, allowing them to add all of the original's neat little touches. The team, which is rounded off by Pierre Lortoux on sound, have been working on the conversion since before Christmas, and the game is roughly 70% complete. One of the programmer's greatest fears is that he has managed

to mimic the arcade game in virtually every way, including its speed. Of this, Ocean France's Development Manager, Marc Djan, is justifiably proud, as he is of the view that "it is probably the most important factor". As anyone

who has played the coin-op will tell you, *Snow Bros* plays at a fair old speed and, thus, ensures the conversion's sprites zoom around like their mad arcade counterparts is essential. How the whole thing will hang together, though, will be revealed in the next couple of months when *Snow Bros* is released. Stay tuned for a full review.

FROST IMPRESSIONS

During the conversion of *Snow Bros*, Ocean France received very little help from the coin-op manufacturers, Toaplan. With the

exception of a coin-op to work from, the team had to play the coin-op from start to finish, making notes of key animations and graphical techniques.

Similarly, all the coding techniques had to be worked out this way, with Pierre studying the

game in great detail, and working out the basic logics needed to reproduce the enemy sprites' intelligence. From here, the graphic artists then started to reproduce the individual screens using ST and Amiga-based systems, and specially written software which allowed them to animate the sprites

within a very small amount of memory and also compact the screens. With the memory saved by these special techniques, the actual coding was made easier, and Pierre was allowed a pretty much free reign to incorporate high-on everything from the coin-op.

GEM'X

ビッド!

Are you ready to take on Kiki and her friends in this unique game of strategy and skill?

Match up the 3 patterns of stones on the screen - special combinations give bonuses and secret levels. Succeed within the time limit and gorgeous girls will lead you to the next tantalising level!

If Kiki isn't temptation enough, then 400 levels of stunning graphics, sound and speech, and gameplay so addictive that you will have to be dragged screaming from the screen, surely is.

Available on Amiga (£4.99), Atari ST (£4.99), PC (£4.99), and CDi (\$10.99 each, £4.99 each).

F15 STRIKE EAGLE II

F15 Strike Eagle II follows F19 and Gunship into the front line. The latest and greatest

AIR SUPERIORITY

The F15 Strike Eagle is the latest in a long line of F15 Eagles, whose development began in the mid '60s. Originally conceived as an ultra-powerful, ultra-fast air-superiority fighter, the design has developed into an air-superiority fighter with ground-attack capabilities.

The F15 Strike Eagle is one of the fastest, most manoeuvrable, and most powerful military aircraft in the world. It has the capacity to carry the latest air-to-air and air-to-ground armament in addition to its 20mm cannon.

The latest version of the Strike Eagle is equipped with a sophisticated zoom FLIR/TV/Laser target tracking system that allows the pilot to see close up views (either TV or thermal) of the target at all times.

MICRO PROSE™

...d greatest from MicroProse will soon be available for Commodore Amiga and Atari ST.

THE CU COLLECTION

ON YOUR DISK

A taster of U.S. Gold's new beat 'em up, **Shadow Dancer**, which features a sample of what to expect in the multi-stage fighting epic. Also, we are proud to present the hottest demo doing the rounds at the moment - **Madness 2**.

SHADOW DANCER

SUPPLIER U.S. GOLD PRICES £24.95

Shadow Dancer from U.S. Gold is the striking sequel to *Shogun*, and follows the further action of the white clad ninja as he battles to free a group of hostages from the hands of a dangerous band of terrorists. Set in the not-too-distant future, *Shadow Dancer* involves negotiating a number of stages until you eventually make it to the space shuttle where the hostages are being held. Scattered throughout the levels are a number of explosives which are being guarded by larger guardians who must be defeated before the bombs are detonated. However, just one bomb will do the necessary damage, so every one must be found before the game is over. To the Ninja's advantage, though, is an arsenal of throwing stars, a sword, and a lethal dog who kills alongside him, and can be set upon any attacking terrorists. In addition, retained from the first game is the ever-popular ninja magic, which is activated via the space bar. There are four varieties of the magic, which range from a fast-opening Buddha to a series of white winds, and each clears the screen of enemy sprites and their bullets.

Our playable demo allows you to get used to the ways of the ninja, and contains a number of the first game's early sections. The first game will open six large stages, each of which is broken up into a number of smaller levels. Each stage is set over a multi-directional scrolling play area, starting in the airport until the ninja eventually makes it to where the shuttle is being held. Control over the ninja is effected using the joystick, and the directional controls move him left and right, with up and down sending him into a crouch, and up prompting a jump. In addition, the ninja's limited supply of throwing stars are accessed using the firebutton and when these are exhausted or all enemy sprites are close contact, control is automatically swapped over to his sword. Finally, the dog is sent into battle by holding down the joystick and pressing fire, but can only withstand a limited amount of damage before returning to his master the size of a scared Gerbil!

Similarly, *Shadow Dancer* allows the ninja to jump behind objects, such as fences, and this is achieved by pushing the joystick up and pressing fire - this method is also used to climb on to the higher platform.

MADNESS 2

Easily the most impressive demo we've seen for ages, *Madness 2* has been written by the UK branch of top European coders, Acornity. Featuring some very clever jiggery-pokery, the demo is a follow up to the smash-

hit, *Madness*, released late last year, and has some of the largest vector graphics we've seen (and a neat fire effect). In fact, we were so impressed that we felt that everyone deserved to see their nearest offering, so here it is in all its glory.

LOADING THE DISK

Just stick the disk into your Amiga's drive and it will auto-load.

A menu screen will appear, and just select which demo you wish to view or play. And that's it!

WON'T LOAD?

If in the rare occurrence of your disk failing to load, stuff it in an envelope and send it to:

CU DISK NETWORK
PC VIDE
BENTLEY INDUSTRIAL PARK
PETERBOROUGH
NN6 8AN
(0748-488)

They will check the disk and send a replacement as soon as possible. Please don't ring the CU offices regarding faulty disks. If you have a problem, PC Video have an emergency phone number which is open from 10.00 - 10.30 weekday evenings. The number is: (0448) 600020.

first impressions

Dressed in his mum's best tea towel, our resident Doris Stokes, Steve Merrett, takes a precognitive glance at forthcoming games...

HOSTILE

PALACE return after a short break with a game of destruction.

GAMEPLAY: Spanning eight levels, *Hostile Breed* is Palace's first entry into the 16-bit shoot 'em up arena. As a humble shuttle pilot on the planet GENARO-5, your job normally entails ferrying people to and from its key land sites. However, due to a massive earthquake, disaster has struck Genaro, and a series of deadly life forms have escaped from a high-security research station. Taking the form of deadly vegetation and mutated animals, the escaped mutants have spread like wildfire through the planet's eight key sectors, rendering the world's defences useless. In addition, should the mutant skeletons reach the planet's centre then all life will be extinguished. Using the meagre weaponry on board your shuttle, it is up to the player to guide the shuttle through the eight horizontally-scrolling levels in an attempt to stop the mutants reaching the centre.

However, using the computer aboard your ship, the player can link up with the associated wall-based gun towers and use them to clear a path through the rapidly regenerating fauna and wildlife. In addition, any damage to your craft can also be repaired using this system, thanks to a small party

of repair droids who can be called into service every now and then. More importantly though, using your computer logically can make later stages of the game significantly easier as weaponry can be accessed in advance, but even so, it's still going to be tight...

PLUS POINTS: The idea of linking up with the planet's defence and repair systems is a good one, and offers new life to the jaded shoot 'em up theme. In addition, it also adds a strategy element to the game as there is only so much power available from the central reactor, and thus it must be carefully distributed - which gets increasingly harder as the aliens start to near it. Also, the graphics add a nice bio-mechanical feel to the game, and look almost perfect like in their execution.

BEHIND THE SCENES: The key to *Hostile Breed*'s success depends on how easy the exterior weapons will be. If they are easy to skip through whilst keeping the shuttle out of harm, then all will be well and good. But if it is a long-winded system of, say, hiding down the frequency is used (as in *White Shark*), then valuable lives could be lost unnecessarily. In addition, the shoot 'em up theme is now looking extremely tired, with very few new innovations, and failure to incorporate a decent system will result in

another entry to the ranks of the unimproved latest brigade.

FIRST IMPRESSIONS:

It has to be said that *Hostile Breed* is a mean looking shoot 'em up. Graphically it's superb, with Jo Walker's unique style of graphics (he also worked on *Demolisa*) looking simply brilliant. With the coding in the hands of Rob Stevens, the game should add something refreshing to the shoot 'em up genre. Not's last game, *Savage* for Thomson, was an interesting little oddity, and if he can incorporate half as much of *Shane*'s playability, then Palace could be on to a winner.

Jo Walker - currently recovering slowly on Palace's new machine.

Integrating *Hostile Breed*'s shoot 'em up action is a strategy based system where the planet's weaponry can be reconfigured.

SUMMER CAMP

HIDE-HI-JINK with Thalamus's cute mouse.

GAMEPLAY: With only *Flawless* and *Minotaur* (aka *Clowder*) under their 16-bit belts, Thalamus's next release is a conversion of their popular 64 platform romp, *Summer Camp*. Controlling a cute mouse, the player is given the task of battling his way through the series of tick-tock screens which make up the *Summer Camp* of the title. An outbreak of deadly creatures have appeared from nowhere and have overrun the camp, leaving away the all-impor-

A few of *Summer Camp's* cute but deadly enemies...

tant visitors, and ensuring that the place will shut down.

As the plucky rodent hero, the player must run and jump through the game's massive play area while avoiding contact with the countless enemy sprites and collecting the assorted bonuses which are scattered around. The play area can be explored fairly freely, and each screen is made up of a series of platforms upon which the cute but evil sprites roam.

PLUS POINTS: The graphics look all the better for the clarity the Amiga can afford, and the screens are very attractive. Despite looking a little similar to *Hotland*, *Summer Camp's* visuals are perfect for the cute nature of the game. Similarly, the extra memory the 64 has over the 64 is being put to good use in the gaming department, and Thalamus are confident that they will be able to squeeze even more into the final version than they originally hoped for.

BEHIND THE SCENES: Creative Materials are the

guys behind the conversion, and work has been going on for nearly three months. With *Line Of Fire* and *85W4F* already under their belts,

Summer Camp is a slight departure from all-action games that Materials are normally associated with. DPoint II is being used to put the graphics together, and the game currently exists as a dozen or so screens, while most of the sprites have been drawn and are ready for ani-

mating. If all things go according to plan, *Summer Camp* should be released some time in July.

FIRST IMPRESSIONS:

From what we've seen, the lack of variation may cause a few problems. The original game was more too hot (although 64 screens did go up over it - still, with so little new stuff available, of course they would), and this is reflected in this conversion. Creative Materials have added a lot of new stuff but, with platform games such as *Prince of Persia* and *Hotland* on the way, it may not be strong enough.

The summer camp has had its share and Wiggins flag pinched, and is suffering from being overrun by evil creatures. Guiding the mouse from screen to screen, have you got what it takes to save the camp from certain doom? Find out when it's released next month.

COMPLEX

COP a load of their As Palace take us back to the future.

GAMEPLAY: According to Palace, the Earth of 2051 is a swamy place overrun by criminal gangs and certainly no place for the soft. To bring a certain amount of law and order into this

desolate place, would-be cops have to undergo massive training regimes and can only begin pounding the beat when they are in full control of their robotic suits.

Complex casts the player as a cop leader for the force, and the player must guide their agile on-screen persons through the massive building that forms the complex of the title. As you grow more proficient at the game, more and more puzzles and aliens are thrown at you to test you to the limit. Taking the form of ladybirds, window cleaners, and shopping trolleys,

these cunningly-disguised devices should be avoided at all costs or at the cost of some of your energy.

Protection against the odd plethora of sprites comes in the form of your gun which can be used to pick off the attacking characters. In addition, the *Isaac* has access to over 125 names of ani-

first impressions COMPLEX

mation, making him one of the most agile sprites ever according to Paislee. Your ultimate aim is to reach the end of the Complex and thus enroll into the force — but heaven knows what you'll face then.

PLUS POINTS: Graphically, Complex looks quite similar to U.S. Gold's forthcoming *Sanagosee*. Paislee are evidently very happy with the animation of the main sprite, and with 120 smoothly-drawn frames, they can be justifiably proud. As with Paislee's *Hostile Breed*, once again the graphics are of a very high standard, and coupled with the weird sprites and enemy characters

that are floating around, create a decidedly odd atmosphere.

BEHIND THE SCENES: The programming of Complex is in the hands of Palace newcomer, Sean Paislee, who previously wrote converters of *Handball*, *World Games* and *Platform*, for the likes of Accolade, U.S. Gold and Ocean. The basic design is the brain-child of Hostile Breed's Jo Walker, who is also drawing the graphics and has really gone to town on the weird variety of sprites that patrol the complex's many platforms. Work began four months ago, and the game is scheduled for an April release.

Jo Walker's graphics for Complex are in the same unique style as those of *Demolish* (see last month's *Development*), and its bright and colorful. The interface screens are particularly impressive.

FIRST IMPRESSIONS: From what we have seen, Complex looks as if it is going to be extremely different. In terms of gameplay it isn't particularly innovative, but the colorful and oddball sprites add to the game's futuristic feel, and the shoot 'em up action is fast and furious. There may be a problem with repetition, as the complex is very big and the task doesn't vary much, but it does look like Complex could be a fun and undemanding little romp.

ATOMINO

PSYCHOSIS prepare to rack our brains with a molecular puzzle.

GAMEPLAY: The basic object of Atomino is to create chains of molecules by joining individual atoms together. Each atom has a value of between one and four, which determines how many additional atoms can be joined to it, and a molecule is only complete when no more atoms can be attached. Some levels

require you to build the molecule within a confined space, or the player may be asked to follow a set pattern or build it up to a pre-determined size.

PLUS POINTS: Initially very playable, Atomino is fast, original, addictive and not too complicated. Providing people aren't becoming bored with the ongoing resurgence of the puzzle game, this should do very well.

ANY QUESTIONS: The game has been programmed by Rainer Reber, with graphics by Thomas Knapp and music by Hans Hermann Frank. The German-based development team have been beginning work on it for four months now, and the game should be reviewed next month.

FIRST IMPRESSIONS: As it's entering the final stages of development it's easy to gauge how the finished game

will look. The graphics and sound are very simple, and we're not shattering much. It plays extremely well, though there is a danger of Atomino becoming lost under the tidal wave of puzzle games. The way the levels change to set new tasks should give the game plenty of lasting appeal. There has never been a puzzle game that's had excellent graphics, and this will not be the first.

Looking conspicuously like an old school biology model, Atomino contains division puzzles with ten-point thinking — guaranteed to have you pulling your hair out. The game is 80% complete, and will be reviewed next month.

ARCHAEO WHITE SHARKS

Take to the skies in this all-action arcade game for 1 or 2 players ...

White Sharks is packed with features, including simultaneous 2 player gameplay, near-photographic graphics, hi-fi quality music and effects, and a completely unique weapon customising screen that allows the player up to 37 million different weapon combinations!!!

To succeed, each level and alien will require different tactics, while the fast-paced action will keep the trigger finger on overtime. Take the challenge in this shoot-em-up with a difference!!

A WHOLE NEW WORLD OF POWER

NOW WITH THE **NEW**
SYNCR EXPRESS
MK III

FORGET BANK V

£34.99

HIGH SPEED DISK DUPLICATION SYSTEM

THE ANSWER TO YOUR DISK DUPLICATION PROBLEMS

- ☐ SYNCR EXPRESS IS A HIGH SPEED DISK DUPLICATION SYSTEM THAT WILL PRODUCE COPIES OF YOUR DISK IN AROUND 10 SECONDS!
- ☐ Syncre Express requires a second drive & works by controlling it as a slave device & ignoring the computer disk drive controller chip ensuring high speeds & great data accuracy are achieved.
- ☐ Menu driven selection of Start Track/End Track up to 80 tracks. ☐ Ideal for clubs, user groups or your own disks.
- ☐ Very simple to use, requires no user knowledge. ☐ The most powerful Disk Copier ever conceived.
- ☐ Also duplicates other formats such as DSK, ST etc. ☐ No more waiting around for your disks to copy.
- ☐ Probably the only duplication system you will ever need!
- ☐ Now with a SUPER POWERFUL "SYNCR" MODE that actually synchronises your Disk Drives for even greater accuracy!
- ☐ Can be switched OFF when not in use - totally transparent. ☐ Make up to 2 copies simultaneously!

PLUS MANY NEW FEATURES INCLUDING ...

- ☐ DRIVE SPEED CHECKER - now you can check the speed of your drives - DF0-DF3. Easy and very accurate.
- ☐ DISK TOOLKIT - Syncre III now includes a range of Disk Tools - Fast Format, File Copy, Raw Disk, Disk Rename, Hard Drive File Copy etc. etc. Easy to use.

If you don't have a second drive we can supply SYNCR EXPRESS together with a DIGITAL DISPLAY Drive for **ONLY £99.99**

PLEASE STATE AM94

Electronics

Now your money goes even further with Commodore,

There's a little bit of Commodore in all of us. Excitement and adventure, you saw it for yourself in our Christmas commercials. Now your money goes even further with Commodore.

Screen Gems with 1MB RAM only £299.99

A huge leap in RAM for Amiga

Our Amiga 500 Screen Gems pack, the UK's most popular 16-bit home computer has now doubled from 512K to 1 Megabyte of RAM. This gives even more power to educate, entertain, inspire and stretch the imagination. It's still only £299.99, saving you almost £100.

Screen Gems includes mouse, Deluxe Paint II and four exciting challenges, including: Back to the Future II, Nightbreed, Shadow of the Beast II and the devastating Days of Thunder.

If you're looking for great Amiga value, you could even trade in your old computer for a fantastic world of

graphics, animation and sound. For just £209.99, you can now buy the Amiga 500 computer and monitor, saving you £70 on the normal price.

The C64 with joystick and games cartridge just £119.99

A spectacular fall for the C64

Undoubtedly, the world's best selling home computer, the C64 is now excellent value down from £159.99 to £119.99.

This month, the C64 brings instant fun for all the family and comes complete with joystick and games cartridge consisting of International Soccer, Elax, Fendish Freddy's Big Top O'Fun and Filmbot's Quest.

All games cartridges produced for the C64 Games System are compatible with the standard C64 Computer. And all Commodore computers, together with a wide range of peripherals, are available at selected high street stores and at most independent computer retailers.

For full details of how you and your money can go to amazing lengths with Commodore, call 071 873 9800 or send the freepost coupon below.

All prices are inclusive of VAT.

Please complete your details and return to:
Commodore, Freepost 36, London W1E 9PH.
Please send me details of my nearest stockist.

THERE'S A LITTLE BIT OF
COMMODORE IN ALL OF US

SCREEN SCENE

Welcome to Screen Scene, the essential guide to Amiga games. Our reviews are timed to coincide with the release dates of the games themselves, so you won't find any out of date reviews here, only up to the minute information from an experienced team of joystick journalists.

SOUND Four channel sampled stereo rock-on a Steak, Alkan and Waterman drum track? The higher the rating the higher you run the volume.

GRAPHICS Not just overall prettiness, but animation, style, design and the way the visuals fit in. (So it doesn't have to be the prettiest game in the world to score high here.)

PLAYABILITY This rating tells you how easy it is to get into a game, and once you start playing whether it's addictive or uninteresting drudgery.

LASTABILITY Speaks for itself. The higher the rating the longer you'll be loading it up. Ties in closely with the playability rating.

OVERALL The most important of the lot. And here's C's rough guide to ratings:

0-20%	Man, this stinks. Please don't.
20-30%	Below par.
40-45%	Worth checking out if you're a fan of the game style.
50-55%	Above average, but with a lot of room for improvement.
60-65%	Good but flawed.
70-75%	ScreenStar.
80-85%	ScreenStar, recommended.
90-95%	Super Star. Our highest accolade. Must not be missed.

AMIGA SPEC

Watch out for this addition to our reviews. The Amiga is the finest home computer that money can buy and it's really too bad that a game is pushing the boundaries of the machine won't tell you how and why. Each and every Amiga score will be tailored to the review. Some of the ratings are objective—eg number of onscreen colours, levels etc. Others, such as an assessment of the scrolling speed, are based upon the considered opinion of the CJ Amiga team. All such subjective ratings are marked out of ten.

AMIGA SPEC

PREDATOR

The basic design of the Predator alien makes it one of the most efficient killing machines ever devised. It's ability to track the heat patterns of its prey and its light-bending properties which render it almost invisible, along with a weapon inventory containing knives and tracking lasers, make the creature one of the most formidable aliens ever to take on the human race. However, unlike Ridley Scott's injected *Alien*, the Predator hunts for sport rather than conquest and this adds a novel twist to the well-worn *Alien On Earth* theme, and this summer will see another of this noble race set to make South its hunting ground - and Microsoft and Axi Development have teamed up to recreate the blockbuster's action in this four-stage shoot 'em up.

Considering the restraints placed upon it by the limited gameplay, the game actually follows the film's plot quite closely. Set in a grimy Los Angeles of the near future, Predator's plot centres

around good guy cop, Harrigan (played by Lethal Weapon's Danny Glover) who is caught up in the middle of two drug-dealing factions, like a escalating between the two gangs, and Harrigan is stuck in the middle as he does his best to bust the leaders of the two groups - a situation antagonized by the arrival of the eponymous hunting creature. As the situation worsens, and the creature builds up suspicion between the two gangs by wiping out key members, and Harrigan follows up a hunch and sends his partner to where he believes the Predator is hidden. When his partner is relieved of his spine and skull, Harrigan sets about tracking down the deadly creature, but is hindered in his attempt by the timely arrival of the FBI. What follows is a gory escalation of violence, with the Predator running amok in the subway before a final showdown in a meat warehouse.

Each of Predator's four stages is an *Operation Moll*/*Dead Angle* style shoot 'em

Upstairs in the subway, the Predator makes its first appearance - appropriately flipping out the optics of people who stray too close.

Nights for the most part, the darkness and the Predator appear in the distance, but occasionally one will come right up to you - and must be killed instantly.

(Left) On reaching the end of the first stage, Harrigan is checked by the vicious gang responsible for the deaths of the two cops. A similar battle takes place during level two.

OR II

SCREEN SCENE

up with a wireframe image of Hargan floating in front of the action and the horizontally-scrolling play area playing host to all manner of dealers and citizens. Using the mouse to guide Hargan's sights, the player must move slowly, as many of the gun-toting drug dealers are passive whilst keeping an eye out for fleeting glimpses of the elusive Predator and avoiding hitting innocent passers-by. Even if the latter is performed accidentally, as image of Hargan's badge is gradually reduced and should the badge completely disappear, then Hargan will be thrown off the force and the game will be prematurely ended. In addition, Hargan can only withstand a number of hits from the enemy, and should his energy bar be fully depleted, then once again it is time to try again.

The main problem with Predator II is that it sticks to too rigid a gameplay formula. Whereas in the past the more successful film licenses have been made up of a number of related sub-games, the *Op Wolf* style of each of the four levels is too limiting and ultimately dull. Admittedly, the graphics and presentation have been brought up to the highest standards, with a wide assortment of dealers and modes of transport (although it has to be said that I was expecting more from the actual Predator spirit), but it just can't disguise the negative nature of the action. Perhaps I

The game is abound with nice touches. For instance, during the second stage, a water wheel is being used by Hargan and if the money is short, then the aim of the hidden assassin drops along the ground.

Operation *Thunderbolt*-style 3D shooting had been used, or if there had been a *Corporation*-style 'find the creature' section added, then the game would have been slightly more interesting. But, as it is, it doesn't capture the fast-paced action of the film and doesn't reflect any of the creature's menace and power, rounding off a major let-down.

IMPROVE YOUR LOOKS WITH MIRRORSOFT AND CU!

To tie-in with the release of their eagerly-awaited Predator II license, Mirrorsoft are giving two lucky winners the chance to look like the film's central character. Comprising of a superb over-the-head mask and two gasblows - complete with deadly rubber knives - the Predator outfit is an extremely close recreation of the film's creature, and we're offering two lucky winners the chance to win one free! All you have to do is answer the following question, and ensure that your entry reaches us by April 26th.

Name the development team behind the Predator II game?

Write your answer on a sealed envelope or a postcard, and send it to:

CU Predator II Comp, EMAP Images, Priory Court, 28-32 Farrington Lane, London, EC1R 3AA.

Comp Rules: No relatives of anyone at EMAP Images, or Mirrorsoft can enter, and neither can their families. Any entries received after the 26th of April will be automatically out of Predator club.

SCREAM SCENE

With the release of *Predator II*, the horror game genre is experiencing a new revival. CU's fan of the grand guignol, Steve 'More Gore' Merrett, traces the genre's history and looks to the grisly future...

Let's face it, in the post-horror film, there have not been a whole lot of tough guys. If they aren't being pulled to pieces by powerful vicious creatures, they are being converted into high-tech computer games that fail to leave any discerning game player occupied for more than an hour. The first horror film license to appear next Argus Proser's interesting *Alien*, which appeared on the Spectrum, 94, and eventually, Amstrad CPCs in 1984/5. By combining the successful nature of the film with a strategy game, Argus somehow managed to capture the cinematic feel of Ridley Scott's

The Fall Power of Politics
(The road to the West)
Road used in a horse-like
(Doubt, Last Night),
and heavily incorporated
some where a well-regarded
integrating thousands of
systems of the road
(1991)

explained bug hunt, yet it never really took off due to the sheer opposition of the indie creation. The result was a playable after which was a total life-or-death strategy romp in its own right, and a disappointing one at that. The result is the honor theme reappearing in assorted games from 1980 onwards, it wasn't until Donkey Kong that the still fairly unloathed notion of a "proper" honor license (and the deliberately exciting Palace's Elf Dead game), with their game based on the antics of Jason Voorhees in the "Friday the 13th" series of slasher flicks.

Unfortunately, the resulting game was a disappointing misnomer which involved

It Came...and its sequel *And...Floods*, capture the full atmosphere of the 19 movie perfectly, and build up its characters...at least as much as the first.

locating the axe-wielding killer by literally stumbling across him - a feat which normally resulted in a premature end of the game. In a word, a complete dud.

REFERENCES

As the use of the 8-bit machines gradually gave way in the main frame of business

and STs, a sudden rush of horse-based games appeared for the more mature game-eaters.

collected 'creature' licenses, both Microphone's and The

The purpose of the comparison is also very close with the word "primary" present in the name of the company. In fact, the name of the company is "Primary" and the name of the company is "Primary".

SCREEN SCENE

As in a strange game to remember, the film's violent being. However, it's extremely rare for all the blood and guts of violence to get all others. You're the original 'Dead' movie director with various violent scenes, other than you.

So far, only one arcade game has successfully conveyed the atmosphere of a splatter game - the coin-op, Splatterhouse, got Nightmares' brutal intensity.

Edge's conventions of *Nightmare* and *Alien* Syndrome featured storylines lifted straight from the popular *Alien* and *Aliens* films - and, it was only last year that the first coin-op actually based on a horror film was actually released, in a rather neat shoot-em-up built around the *Alien* scenario, and it was far better than the official *Alien* licenses from Electronic Games/Acadvision. From here, things went into a steady decline, with the only notable exceptions being GRL's graphically bloody adventures based on the myths of Werewolves, Frankenstein and even Jack The Ripper - none of which were real licenses.

Then, all of a sudden, a spate of film-based adventures appeared at once, namely Microdeal's *Fight Night* arcade game (although the proposed adventure game never appeared), Screen It's *Jaws*, and UBB's *Buffy's Zords*. Of these, the first two were absolutely distasteful, with very little in common with their big-screen counterparts. However, the saving grace in a spate of big-splat licenses (with Grandis also managing to bodge up a license of Amiga's all-action *Running With the Scissors* - not strictly horror fare, but well regarded by fans of the genre), was the brilliant *Zords* which took George Romero's storyline for *Dawn Of The Dead* and incorporated it into a stunning coin-driven arcade/adventure - and about time, too!

It may seem, the film license game will now have a good chance of being a success. It's a shame that it's not been so in the past.

However, the saving grace in a spate of big-splat licenses (with Grandis also managing to bodge up a license of Amiga's all-action *Running With the Scissors* - not strictly horror fare, but well regarded by fans of the genre), was the brilliant *Zords* which took George Romero's storyline for *Dawn Of The Dead* and incorporated it into a stunning coin-driven arcade/adventure - and about time, too!

THE GORY DETAILS

However, overshadowed by these sub titles, the industry suddenly went into overdrive with big companies such as U.S.

Gold and Ocean securing the licenses to such horror giants as *A Nightmare On Elm Street* and *Nightmare*, whilst troubled Activision announced that they would be releasing a game based on James Cameron's (then) forthcoming *The Abyss*. In addition, Tynesoff's sub-label, Horrorsoft, were boasting away on a game based around America's top horror sex symbol, Elia. Again, though, the development teams behind the projects struggled, and only Ocean's two *Nightmare* games and Elia's eventually made it to the Amiga - with the others falling by the wayside. This was a real pity in a case of *'Elm Street'* as there is a lot of potential for a game based on the antics of Freddy K, but alas it seems he is never destined to appear on our screens other than in video.

form. Even so, the games based on *Nightmare*, whilst not breaking down any barriers, were fairly good, even though they didn't make the most out of the film's shape-shifting creatures. Similarly, after much ado, Horrorsoft's *Elia* finally appeared, courtesy of Activision, and was a deserved success.

SCREAM SCENE

THE GRISLY FUTURE...

As far as the future of horror games goes, it is looking rather rosy. With companies, such as Cohen and U.S. Gold, acquiring the rights to high-on-dread big-budget films that spawn, as long as horror films retain their current popularity then we should see a steady stream of binary horror for a few more years. In addition, when the much-maligned CDTV system finally appears, then truly interactive horror games will

become available with filmed material negating the current range of unrecognizable sprites. In the nearer, more accessible...

future, though, we can expect to see of *Darkman*, *Anachrophobia*, and those

many on the game's style and timing a few ideas around. With *Anachrophobia*, though, the game (which will be distributed free through entertainment international) is nearing completion and looks like a cross between *Chiller* and *Exterminator*, and *Gaming of Controlling*, a number of key characters, the player must rally around avoid-

ing the deadly anachroids and gradually wiping them out via a series of sub-games. All this leads up to a final confrontation with the Big Bob, the spiders' 'teacher', and only when Bob is killed is the mission over. So far, despite a few rocky sprites, *Anachrophobia* is starting to shape up quite nicely. The sub-games are varied and seem to fit in with the scenario and key action sequences quite nicely - though whether they managed to squeeze in the shower scene remains to be seen! Hopefully, it'll be reviewed next issue. All readers of our in Dev will remember: *Dead?*

enders are *Alien III*, *The Evil Dead III*, and *Terminator II*. Cohen have already confirmed that they will be producing a game based on *Terminator II* (subtitled *Judgment Day*), but the other two are still up for grabs and have definite possibilities for good

arcade games. And if these are pulled off then 1991 could be a superb year for fans of the old red stuff.

The shadowy, moody look of *Darkman* is a real treat.

The shadowy, moody look of *Darkman* is a real treat.

DARKMAN

The game's dramatic, horror-themed scenes and action sequences are a real treat.

Both *Darkman* and *Anachrophobia* hold a lot of promise as arcade games, as both are fairly action-packed and feature scenes that could easily make it over to the home.

fresh-slicing instead of countless zombie films are returning in the long-awaited conversion of *Beast Busters*.

RED-DY SOON

So far, practically nothing has been started on *Darkman*, and Cohen are currently toasting

Buster is an *On Thunderbolt* style comp with plenty to kill. Again, stay tuned for a full review within the next two or three issues.

LICENCED TO KILL

Among the first new films of 1991, definite licence con-

As with *Darkman*, *Anachrophobia* makes the most of the 'game content', and every time a life is lost in the suit thing little spiders, then your death is repeated in blood-red pixels.

As Toki progresses towards his beloved, the story and the hazards get larger and harder to kill.

TOKI

As scenarios go, Toki's must rank as one of the weirdest ever. Whilst out with his beloved, the beautiful Mito, Toki could only sit and watch as a giant disembodied hand appeared from nowhere and whisked her away. As Toki stared in horror, the evil wizard Yookimedo appeared, boasted of his love for Mito and swore that if he couldn't have her, then nobody would. Immediately after the kidnapping, he cast a powerful spell on our muscled-out hero, transforming him from his statuesque self into a loopy ape. With the evil wizard's laughter ringing in his ears, Toki dragged his arms along the ground and prepared himself for a trek across the six lands standing between him and his beloved.

In terms of gameplay, Toki runs along pretty familiar lines. Using a variety of ropes and ledges, Toki must run, jump and climb across the eight way-scrolling play area until he comes face to face with Yookimedo for a final

As well as the ability to run, jump, and crawl, whenever Toki jumps into water he dons a pair of goggles and starts to do the crawl! As well as the array of stunts and custom spiked turtles, Toki eventually comes face to face with a huge flat-top guard who's armed with a Trident.

conformation. However, as well as having to contend with the assorted obstacle-based hazards, our hairy hero must also avoid contact with the evil wizard's countless minions who patrol each of the six areas. Fortunately, despite being reduced to a humble primate, Toki has gained an unusual ability to protect himself by spitting vile goo at the attacking creatures, and his pineapple-throwing skills can also be upgraded to the likes of fiery breath or freeze ray—definite when specific items are collected. Similarly, along the way Toki can protect himself from harm with the addition of a crash helmet which provides limited invulnerability from enemy fire.

Each of the levels reflects a different graphical theme, and Toki's adventures take him through an eerie cave system, under a monster-infested lake, and on to a fiery cavern followed by a massive ice palace and a sprawling jungle. The final battle takes place in the mas-

TOKI

live Golden Palace where Toki is believed to be lying held in each stage, the graphics are nothing short of superb, and are almost perfect reproductions of those of the original coin-op. The game's developers, Ocean France (who wrote *Flang for Dosan*), have examined nearly every feature of the arcade parent into the relatively humble Amiga, and, with the exception of the odd load, I defy you to find any major differences — even small touches, such as Toki donning goggles when he goes underwater, have been retained. As well as the superb backdrops and smooth parallel scrolling, Toki also plays host to some of the wildest sprites ever to appear in an Amiga game. Whereas most of the sprites are left to patrol certain areas, Toki also comes up against mortar-throwing apes and small demons who suddenly appear and bob around at him — contact with which results in the loss of one of his five lives. In addition, each level's master is in nicely with the general theme of each stage, with god-spitting plants materialising in the jungle, whilst sharks and mutant turtles harangue our friendly primate during the underwater scenes.

Once Toki has made it through to the end of the stage, he must destroy one of Meowmami's larger aides. Keeping in with the game's general 'weird' theme, Toki's end-of-level guardians have been given names like Rambacha, Mogulvor, and Zarcamoth, and take the form of massive heads, and spear-wielding fish. As has become a rule with end-of-level guardians, each must be killed with a repeated succession of shots, and when they finally keel over, there is a brief pause as the next stage is loaded. As coin-op conversions go, Toki must rate as one of the best yet. Even so, it also falls into the unfortunate category of 'if you don't like the coin-op, you won't like this'. Another slight fault is the game's difficulty level

Toki's guardians are among the most imaginative ever devised, including this odd machine which sports deadly boxing gloves and flame throwers.

Toki can be made to fire in precisely any direction by keeping the fire-button depressed and moving the joystick in the direction required.

A series of coloured icons under Toki will make abilities when collected. By far the most impressive is the fiery breath, but limited protection can be collected in the shape of a crash helmet.

SCREEN SCENE

which has been set slightly too high, and makes progress slow and frustrating. That said, there is a lot to do in Toki, and whilst the basic gameplay doesn't vary a great deal it's extremely entertaining stuff and well worth a shot.

Steve Marrett

A JOURNEY THROUGH THE IMAGINATION...

Starting from the massive underground cave system, Toki almost immediately comes face to face with a wide range of enemies, including similarly-effected primates and little lizard-like creatures who are slowed away in holes and only attack when Toki is directly in front of them. Following the caves is the large expanse of Lake Hagnum which is inhabited by sharks and eel-like turtles. Looking a little closer to the third stage, the following Caverns Of Fire feature moving platforms and massive lava pits, whilst the Ice Palace has crumbling platforms to contend with. Finally, the battle with completion is the confines of the jungle, and the final confrontation takes place in The Golden Palace (so, it's not a Chinese take-away), where deadly perils and mind-boggling lengths must be avoided.

THE SECRET *of* MONKEY ISLAND

Monkey Island's a swirling place — check out the plots on the chain-dealer! The radial map can be used for quick movement around the islands.

Guybrush Threepwood has an ambition in life — to become a pirate. So he's traveled to Monkey Island in the Caribbean to seek his fortune and a way into the closed and elitist society of the swashbucklers. Getting some experience with the finer sea is also on his mind, needless to say. He soon finds out that to join the gang he has to complete three tasks — learn swordplay, thievery, and treasure hunting. While attempting these tasks, Guy soon discovers that all is not how it seems on Monkey Island and the mysterious Mighty Island...

Following in the tradition of other Lucasfilm adventures, Monkey Island has a graphic-based style with animated characters, including Threepwood himself. He not only wanders around, but also interacts with his environment — he'll walk up to and read posters, and he has

At the start of the game, Guybrush has only his wit and ambition to guide him. Soon he learns of the ghost pirate ship, the mysterious island, and the natives' habit of telling first and asking questions later!

a wide range of facial expressions.

Below the graphic display is a list of commands, which activate when clicked. For example, if you want Guy to grab a sword from a table on the far side of the room, click on "Pick up", then on the sword, and our hero will walk straight to the item and take it if possible. The most humorous option is "talk to", choosing this brings up a menu of hilarious options, and nearly always includes some colorful insult (for example, "You're a bunch of half-smiling, gray-bellied pigs").

As Threepwood travels through the islands, he collects the items that are needed to solve the fiendish puzzles. The inventory at the bottom right of the screen shows what he's carrying, and can be scrolled through to find the required object. Solving the challenges is not

SCREEN SCENE

just a question of logic—imagination is vital! For instance, when Guy goes to the circus and meets the Pataucom brothers, they need someone to feed their human cannonball. Unfortunately, they won't let Guy near the cannon until he's wearing a safety helmet, and of course there isn't one on the island. Ingeniously supplies the answer — use a metal pot instead!

As the game progresses, it becomes apparent that the ghost of Captain LeChuck, an infamous pirate of yesteryear, is terrorizing the shipping lanes of the sea. He's also committed to Elaine Marley, the sun-kissed beauty who happens to be Governor of Monkey Island.

As fate would have it, our hero falls in love with her at first sight, which is a little unfortunate, as her mansion contains the idol he has to steal to complete one of his quests! Other characters include a trait, a prisoner with bad breath, and even an ex-pirate called Hook who's scared of pirates and has a talking tattoo (horribly).

As with many Lucasfilm games, Monkey Island doesn't punish the player with instant death for making silly mistakes. Usually there's always a second chance, and danger soon'll be clear. Still, it's imperative to save frequently, as there'll always a point when you realize that you've forgotten something vital earlier on. Therefore make sure you save on a regular basis so backtracking is an option.

Visually this game is

impressive, even though the general style is nothing new from this company. It's

the little touches that stand out: facial expressions, animals acting in a realistic (or silly) fashion, and a host of other details are a delight to watch. The music is also of a very high calibre, with calypso and reggae ditties playing in the background.

Not it's the quality of the play that

makes this a winner. The challenges are always quirky, original and amusing, but not plotted so high that novices will become discouraged early on. I

especially liked Stan, the flashy and anachronistic ship salesman, who loves to haggle over the price of one of his decrepit vessels (or "previously owned craft", as he likes to call them). Getting a ship from him means watching carefully what happens on the screen elsewhere.

When the action moves to Monkey Island itself things really start to hot up, and the story — as well as the graphics — moves up a gear. The main problem with this part of the story is that there's too much backtracking required. Guybrush has to search all over the island a number of times to get results, and this can be a bit of a drag, especially when he's travelling by boat.

If adventures are your thing — or you fancy trying something with humour, challenges and style — I recommend this as a great game to while away the evenings. The size of the adventure alone provides value for money, and the unavoidable disk-wrapping has been kept as minimal as possible. Just don't forget the grin!

Matt Regan

The ghost ship is one of the main objectives of our hero's quest. Once onboard, he's got to contend with cooking fires, ghosts, chickens, and shipmates persistently granting their grin!

The boat guarding the bridge doesn't respond to politeness, unlike so many of the inhabitants of the area. You're best bet is to use the fastest means possible to get past him, or he'll see you!

Guy's explorations take him to the fortune teller, a woman with a woad taste in house furnishings. As for the man on the corner, he has a parrot worth studying. Want to buy a knockknock?

CHUCK ROCK

Unlabeled Core Design's latest platform romp takes the player all the way back to the Stone Age when men were real men, women were real women and big green dinosaurs with awful intelligence problems were an unfortunate part of everyday life.

Drawing inspiration from cartoons such as Captain Caveman and the classic Flintstones, Chuck Rock is a five level platform game split into twenty-five zones set in a jungle, caves, under the sea, in an ice world and a dinosaurs' graveyard.

The game proper starts with our Meanderthal hero trudging across a platform-packed jungle landscape full of prehistoric monsters, dinosaurs and other Detachable creatures, all of whom are out for his blood. To combat these, Chuck can either leap into the air and kick them, pick up a rock and throw it, or hit an where it hurts with a powerful earth-shattering belly-out.

This first level, made up of four zones, is set in a prehistoric jungle. To reach the end-of-level shielder, Chuck has to combat leaping-like creatures that unexpectedly leap out from the undergrowth, animals that suddenly transform into giant hammers and Monkeys which pepper the air with coconuts.

The second level takes place in an underground cave. Chuck has to jump from rock to rock and hop onto moving platforms to get a lift powered by cat-like

creatures running round head-mills. The second zone in level two begins with an earthquake, the screen literally shaking violently—an effect I've used before on the magazine but never on the Amiga. Moving on into the level, Chuck finds himself in the middle of a volcano, complete with lava flows and little fire sparks which jump out and run around after you.

Level three takes place in a watery domain with only small islands sticking out from the sea. Chuck has to hop from one tiny island to the next. Although he can swim, he can only hold his breath for a short time. If he stays under water too long his face turns blue and his arms start to paddle faster and faster

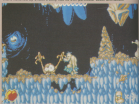

The Country-singer Chuck comes replacement to allow coloured bats slide and the biggest boss belly this side of EA's editor.

until he's thrashing about in the water in a near fit. Mad snapping crabs with massive claws and large blue swordfish make up some of the cartoon innovations. Back the swordfish underneath and his sword crumples up like

Below This weird character steps around in the mud and occasionally does up-wings his arms wildly for no apparent reason. Each character that's harnessed to Chuck's belly has its own particular death animation.

DAZZLING INTRODUCTION

With arms dragging along the floor and a grin to rival Jimmy Kne's, Chuck lives with his wife, the beautiful Optelia, in a crumbling one-room stone cave. The opening animation sequence shows Chuck waddling his low-back TV while the news broadcaster announces the invention of the wheel and the discovery of fire. Chuck's wife, meanwhile, is busy hanging out the washing in the back garden, using small reggie-like creatures as pegs.

Unknowing to either, the dastardly Gang Gutter has fallen hopelessly in love with Optelia and schemes this opportunity to drag her off by the hair to his secret lair. A heart-broken Chuck, realising that something is amiss (he's a punk, after all), spends valuable energy in stop-bathery as he realises he's not wearing his T-tights. Quickly remanaging up a pair from a nearby bush, he sets off to bring the dastardly Gutter to justice.

As well as the main intro, there's also a nifty two-minute heavy rock tune (naturally) featuring Chuck on lead guitar, Optelia on bass, Gutter on drums and an upright bassoon.

Discussing his shift on rhythm guitar, each character has been animated to move in time with the music and to play their instruments only when appropriate. It all adds up to quite an intro with superb graphics and some of the best animation you're likely to see on the Amiga. Thankfully, the massive opening sequence can be skipped, so you won't have to sit through it every time you want a game, good though it is.

SCREEN SCENE

Cartoon life are powered by cat-like creatures, running round aimlessly (as seen as Chuck slips off the platform, they drop down to their knees and fall face-wards).

On perching on the tail of a dinosaur-type character and shooting a rock onto its head, the resulting force propels Chuck into the air so he can reach the platform above him.

an accordion.

An ice-covered world greets our hero in the next section. The colour used in this section has been given a bluish tint to reflect the cold, and Chuck's breath is shown as an icy cloud. Dangers here come from falling icicles, fast-moving creatures trapped in blocks of ice, and a cute little character who scoops up handfuls of snow and tips snowballs at Chuck.

The fifth and final level is set in a dinosaur graveyard with lots of dead dinosaurs and glowering bones littering the area. Indeed, many of the platforms are made up from a patchwork quilt of different parts of bones. Further on in the level, Chuck gets to explore the innards of a particularly large dinosaur. Here, rooms pop out of the ground, butterflies appear in the darkness (and animate like growths slither about ready to engulf any who cross their path. After a particularly gruelling boxing match with Tim the Tyrannosaurus, Chuck finally gets to confront the evil Gutter and rescue his wife.

Chuck Rock is a big game, with each level made up of between 30-100 screens. It's been put together with a lot of finesse and is very stylish and funny. The joystick controls are easy to manipulate and straightforward. The only criticism is the initial difficulty in timing Chuck's belly-balls, but that comes with practice. There's no time limit to the game, so there's ample

opportunity to explore each level - it's so easy to race through each section and miss a lot of the incidental funniness. The in-game tone is jolly enough, but best are the atmospheric sound effects of beating African drums and the various noises emitted by each character. As usual, there are end-of-level bonuses to bump-off, which takes some doing, but with names like Steve the Sabre Tooth Tiger and Frank the Triceratops it's hard to take them seriously - until it's too late!

My only criticism is that the game is a bit too easy, and despite the very high standards of animation, there really isn't that much to do. The puzzles are a tad easy, and once the controls and timing have been mastered, it's a doddle to escape off the map borders. That apart, it's still one heck of a game with the best cartoon graphics I've ever seen. Great fun and one of the best games so far.

With *Lemmings*, Psygnosis created a brilliant extension of the puzzle genre, by adding cute characters and easy humor in an almost arcade game form. Now it's Microsoft's turn to enter the field with *Brat*, which also features cute graphics and puzzle-orientated gameplay. Nathan, the first of the five, is stuck in Bratislava, a world filled with danger:

enemies, and surrounded by a bottomless chasm. Unfortunately, Nathan has lost all control of his limbs and the only way he is ever likely to escape the four worlds that make up the chasm is thanks to the intervention of an unseen force — you. The player is given the task of guiding Brat to the end of each stage by

using a series of icons to change his direction and bridge seemingly impossible potholes.

The bulk of the action is depicted as

a smooth-scrolling 3D play area to the left of the screen, and the all-important control icons are located to the right. Using the mouse, the icons can be picked up and positioned in front of our wandering cherub, altering his direction or maybe halting his progress temporarily. However, the perpetually scrolling screen acts as a time-limit, and whilst it can be temporarily halted using a 'stop' icon, should Nathan wander off the screen, one of his three lives are lost. In addition, lives are also lost if he comes into contact with the myriad of deadly creatures who line the route or if he's allowed to wander over the edge of a chasm. What's worse, losing a life also means that Nathan is repositioned at the very start of the stage, and that the entire

route has to be retraced — this is totally unnecessary and extremely tedious, particularly if you are within inches of the next stage.

Comparisons of *Brat* and *Lemmings* are inevitable, and the Psygnosis game is by far the more addictive and enjoyable of the two. Whilst *Brat* has better graphics and some very nice sound effects, the actual gameplay is tedious and long-winded. Even though the four worlds have been broken up into sections, being sent right back to the start is extremely annoying and frustrating. Similarly, the puzzle element isn't as strong as that of *Lemmings*, and the result is an uneven puzzle/platform romp which is impressive to look at but falls in the gameplay stakes.

Steve Merrett

The four worlds house creatures that tie in with their particular theme, with Toyland playing host to deadly jack-in-the-boxes, and the Moonbase to escaped space bats.

The accurate positioning of the arrows and icons is essential when thinking ahead. If an arrow is positioned as Nathan wanders on to it, he'll ignore it and continue on his way.

SCREEN SCENE

Extra lives are scattered throughout each level, the fun resembling the original, and much smaller, fans of the first game which is a nice tribute. There are also globules to collect which put money in your pocket for a trip to a shop halfway through every level and again at the end of each one. Various test food items, such as pizza and hamburgers, provide much-needed energy top-ups.

Level Two and our hero gets down to some serious bashing with his laser gun.

Watch-out for this heavily fortified level which opens out directly onto the ocean in a wide area.

SWITCHBLADE II

Leaving the soundtrack behind them, Gremlin Graphics are set to release the long-awaited sequel to their platform slice 'em up, *Switchblade II*. In a radical overhaul, the new game's been totally transformed from a cute arcade ramp into a fast-action platform blast.

It's been two hundred years since Hero defeated the evil Havoc and saved his people from eternal enslavement.

Unfortunately, Havoc survived the encounter and has been licking his wounds and plotting revenge ever since. Now he's back, ready to kick ass and punt all soldiers into a thick messy paste of blood and bones. All is not lost, however, as one of Hero's descendants, a muscle-bound sword-wielding warrior, is desperate to prove himself in combat. Obviously lacking a bit of the ol' grey matter, off he tries to confront

Havoc and save the day.

Switchblade II's set over six enormous levels, each one made up of between 80 and 130 screens. With over 800 screens in all, the game's more than four times as big as the original with a vast array of weapons to collect and enemy droids to slice apart. Even the main character is twice as big as the previous sprite and sports much more detail and additional frames of animation.

Level one is set in the same dark and dank underground city complex as the first game. It's a self-mapping section where the player has to destroy sections of wall before another room is revealed. There are various ladders, stairways, and lifts to help move about the level but, conversely, there are also various blasters, homing droids and guard robots to impede your progress. Laser gun barrels are placed at strategic points throughout the section and fire armour piercing pulses of light which prove difficult to dodge. There are also electrified corridors, spiked floors, land mines and a variety of other

such impediments. Reach the end of all that lot, and you'll come up against a super-tough end-of-level guardian who also makes a reappearance later on during levels two and three.

The claustrophobic and dirty-lit underworld of level one gives way to yet more fast and frantic action in level two, a horizontally scrolling affair with an assault course of crates and platforms to overcome plus armour-plated armadillos which carry portable mortars capable of pepperin' the area with miniature torpedoes. Starting off at the base of a cliff, the player has to fight his/her way up to the top and confront an end-of-level warrior.

The material effect on level four isn't all that effective. The constantly changing backdrop is rather distracting and doesn't really give the impression of a scrolling wasteland.

GREMLIN £24.99

Fast and addictive platform blast - great fun!

GRAPHICS	90%
SOUND	79%

PLAYABILITY	90%

OVERALL 90%

SWITCHBLADE II

Level three is just over a snow-capped mountain range while the fourth takes place beneath cascading waterfalls. There's a choice of routes to take, unlike the linear and predictable route of level two, but beware of dead ends. Crossing rocky wooded bridges while being shafted by gun placements, affix droids, super-bombs, gunships and unshakable howdahs isn't easy and you'll need all the power-ups and extra ammo you can collect. Ammu-plated sentry droids with razor-sharpened barbeds are on the loose and if you get caught by a one-two combination it's goodbye to one of your lives. The final two levels are set over a waterfront and volcano respectively. The first two massive boat-like missiles launching from the water while the latter has deadly lava pits and molten avalanches to contend with. Complete this final level and it's a face off with Haseo himself in an impressively frantic 'meatier of all battles'. You have been warned.

There are five different weapons to collect: machine-guns, flamethrowers, lasers, shurikens, and homing missiles. Machine gun fire is the least effective with the homing missiles proving the most efficient at bumping off the opposition. They come around the screen taking out a scoreful of bad guys in

The sherry-girl rises as George Allan (left) and Paul Gregory take a well-earned rest.

one go. Flamethrowers and lasers can pass through objects and the shurikens can bounce off walls and rebound into the enemy. Unfortunately, firepower is limited and can only be replenished by picking up special ammo boxes dotted around each level. Run out of these and it's back to hand-to-hand combat although if you're close enough you can use your sword to take a slash at the advancing alien slime.

The game's been designed and developed by George Allan and Paul Gregory, both of whom worked on *Conan's*, rather swish environmental shoot 'em up, *Venus*. Taking on the sequel to *Switchblade* must have been a bit like stepping into dead men's shoes as the original game was handled

SWITCHING ON TO SWITCHBLADE

Work started on the game last August and influences include *Strider*, *Metroid* and the brilliant *Midnight Runescape*. The team decided early on to utilize the Amiga's 32-colour capability and full 256 line PAL screen, rather than opt for any fancy parallax scrolling. With bigger sprites and subtle use of colour the game looks a treat. There are a lot of interesting touches throughout - look out for a King Kong-type character hanging off the edge of a skyscraper in the background of level two and the puff of dust that rises from the ground everytime your character takes a jump! The game updates at 50 frames a second so the scrolling is silky smooth and the in-game tone is suitably atmospheric as are the numerous digitized sound effects.

by Cone Design who split from Gemin last year. However, George and Allan have come up with a host of new ideas. Although the first level of the game looks its bit to, and mimics the gothic style of the first game, from there on *Switchblade 2* is a creative creative all its own. It's refreshing to see a game which builds on the strengths

of its predecessor yet introduces enough new elements to give it a character all its own. For too often software seems content to offer more of the same, hoping to live off the success of the original.

Switchblade 2 is fast, frantic and fun and a big improvement on its critically acclaimed predecessor.

—Glen Gingsby

Huge missiles burst from the river. To make progress, you have to jump from platform to platform avoiding the fast-moving warheads.

bullets prove ineffective as this heavily fortified foe both back moves in the air. In make-matters-worse, you've also got to contend with a squadron of alien fighters. Think fast or you won't be around for much longer - jump into the floating platform and take out the fighters before attacking the big guy.

The floating river and driving rain in level five work a treat and, together with the detailed graphics, help give the waterfront section a foreboding and eerie atmosphere. With the flamethrower set at maximum, nothing can stand in the way of our hero.

Look out behind you! By level three things have started to heat up. The larger droids like nothing better than moving in close for a spot of Glib. They're quite slow but if you get caught between two of 'em you probably won't live to tell the tale.

A droid plane unleashes its deadly cargo of bombs which explode as they hit the ground. Watch out, too, for special cluster bombs dropped from planes via gunships. At a certain height they explode and split into several smaller bombs.

A SEQUEL THAT EXCELS THE ORIGINAL

Published by SOFTGOLD INTERNATIONAL LTD

8 MILLSIDE INDUSTRIAL ESTATE, LAWSON ROAD, DARTFORD, KENT, DA1 5SH. TEL: 0332 30513/16 FAX: 0332 303402

Your loyal troops slaughter the barbarians with a frontal assault, and the leader surrenders.

The chariots line up for the beginning of the race. Games are important to keep the people happy.

CENTURION

DEFENDER OF ROME

Building the Roman Empire took millions of people hundreds of years—but now Electronic Arts are asking you to achieve world domination in an afternoon or two. With no need to don a shield and eat larri' langues, *Centurion: Defender of Rome* casts the hapless player as an ambitious general in the third century BC, after Rome has 'persuaded' all its neighbouring states to pledge allegiance to it. Now she is casting her eye across the natural boundaries of Italy.

At the start of the game, the only tasks that can be attempted are raising legions and building fleets. This is enough, however, to enable the conquest of a

small, nearby state—Sicily's a good bet. Once the orders are given (and the game uses a one-move equals one-year system), the action switches to a display of the battleship. Each cohort (a group of soldiers or cavalry) can be issued individual orders, and a battleship is chosen from the menu. This ranges from an all-out frontal assault to a more sneaky flanking manoeuvre.

Retreat is always an option, but the idea is to pick an enemy you are assured of beating! If in doubt, the battle plans include a defense option, which lets the enemy come to the Romans, and every tactician knows that defense is easier than attack. Once the foe has

been trounced, it's back to the map that's the cornerstone of the game. The general then sets the tribute level, which must be a balance between revenue and diplomacy; if it's too high, the subjects may revolt.

Sea battles occur with alarming regularity, especially against the great sea-faring nations, Carthage, Athens, and Sparta, and boarding are legitimate tactics.

Once enough regions have been subdued the successful officer starts to have problems with unhappy citizens in Rome itself. The cliché 'bread and circuses' is enough to keep them happy, and money can be spent on these events. The subgames for the chariot racing and gladiatorial contests require different ploys; in the former the player controls the chariot, and the tricky corners tend to cause catastrophe. The gladiator shows are judged by the player, who

decides whether the loser wins or dies—if he's given a good 'performance', it's best to let him live, or the mob have a habit of turning against you.

Keeping a large empire running is not an easy task, what with the dangers of invading barbarians and rebellions, but it has to reward. *Centurion* is perhaps the most entertaining part of the game, requiring a mixture of tact and macho posing. That's not to say the rest

***** (out of five)
***** (out of five)

SCREEN
SCENE

Anticlockwise from top: The gladiators clash in the arena on the crowd begs for blood. Choosing the right opponent is limited by the size of your garrisons. When one is defeated, you choose whether he lives or dies — did he put up a good fight or was he a coward? The main map shows the limit of your conquests, and gives hints as to where to go next. Watch out for the Germans — they're extremely tough!

URION

of the game is dull, because it isn't. Knowing when to take another legion for conquest and when to simply consolidate your Empire can be a difficult decision, but always enjoyable. Learning the various battle tactics takes time, but as the reward is increased revenue it's worth learning. Sometimes you're better off forming an alliance, but unless you can intimidate the enemy with the power of your army it's a waste of effort.

Strategy games are traditionally a hit or miss affair, but I'm glad to report that this has depth and a sufficient amount of historical accuracy. The addition of the arcade sequences provide a welcome break from studying the maps and statistics, and the battle scenes allow armchair generals the chance to test their skills. The graphics are top-notch, and the relief map is extremely

accurate. The sound, too, is very atmospheric, with battle sounds and crowd cheers adding to the fun of the game.

I particularly liked the touches of humour which appear in the manual, although the game itself will have a tendency to be a little dry and monotonous. That taken, I haven't enjoyed a strategy game as much since *Supremacy*, which had what amounted to scenarios — sadly missing in *Centurion*. Despite this, fans of the game will be very happy with the game.

Mark Pegg

THE JULIO-CLAUDIANS

The best-known dynasty of Roman Emperors started with Octavian — later called Augustus. He was adopted by Julius Caesar and thereby nominated an successor. Augustus was the son of a creditor, a good leader. He reformed the law, overhauled the expansion of the Empire's borders, and lost many members of his family (including his sons and grandsons) to secure both safety and otherwise. He was succeeded by Tiberius, who was regarded to be overlord of younglings. However his successor, Caligula, managed to become even more depraved during his reign. He had children by his sister, had citizens tortured at a whim, and made his favourite horse a consul! The line continued with Claudius and ended with Nero, infamous for his unhealthy relationship with his mother and his pretensions to artistic talent.

After what seems an eternity, the sequel to Supercars is here. The originally-named Supercars 2 has been created by the original writer of Supercars, Bruce Southern of Magnetic Fields. Bruce was also responsible for the brilliant Lotus Turbo Expert Challenge.

Since Magnetic Fields were founded nearly two years ago they've putped out a series of hits starting with Super Scramble Simulator. Thankfully, Supercars 2 continues this trend. Supercars 2 is basically an extension of the first game, with the welcome addition of a two-player mode. Using a joystick for player one and joystick or keyboard for player two, the game idea is the same as the first — make sure that you are *swapped* the first five past the line — but with a lot more

added extras to enhance the gameplay. Once the game has loaded, the player has a choice of whether to have the keyboard as an accelerator or brake. I personally found it a lot easier to use the brake option because the car naturally gains speed by itself. You also have the choice to start on the easy, medium or hard levels.

There are 21 tracks, with seven per level. The circuits themselves are a great improvement from the flat racing track of the first game: now you have bridges, jumps, tunnels, and opening and closing doors, whereas before the tracks were limited to a few sharp bends. An added feature is a racing locomotive which crosses the race track at various intersections (Nigel Mansell's type of driving is of great use here). Added to these superbly drawn extras are some 3D

SUPERCARS

Above: The long-awaited two-player split-screen mode is both fast and furious.

Right: There are some tricky S-bends to negotiate as you race around the track to the finish.

SCREEN SCENE

effects—rolling hills and dangerous ramps. The car sprites are made up of over 200 frames of animation so there's a great variety of movement from the car as you dodge obstacles such as oil, stones, ice and water.

The weaponry has been enhanced by the addition of homing missiles, land mines and an exploding missile that destroys your vehicle and

blows up any car near you. There are also small float and lock missiles. The missile deflector (used for itself), this is very useful if you're in two-player mode as it can be used to deflect missiles back at your opponent. The last weapon of note is the lightning-style turbo boost (if you can remember the 1st series). It's very handy for jumping over chasms, or for squashing the cars in front of you, thus saving on valuable missiles.

The game is very pleasing to the eye, with four colours for the car sprites and 64 for the track designs. There's

Cinemaware-type graphics for the interview screens, police station interrogations and even for the transport inspector. This time round you have to stick to the same car all the way through, but the game has its rewards if you skillfully answer the journalist's questions.

The sound effects of the cars are good and there's a likable strain of the engine when going up the hills on the track. When colliding with other cars and obstacles there's a realistic grating noise. *Supercars 2* is a must for any racing fanatic; but it's a shame that, unlike the original, you can't buy a better car or choose a track in the order you want.

Supercars 2 is a great improvement over its predecessor. That was a pity and I'm sure this will be, too.

Richard Ellis

STEERING

Left and right on the joystick affects the car's steering; forward and back are used to access the car's formidable weaponry. Once again, you view your car from a bird's eye point-of-view, high in the sky with your car positioned in the centre of the screen as you traipse around the tortuous tracks. The scrolling deserves a special note, it's particularly impressive. Once control has been selected, it gives you a quick description of the race track you're about to attempt. The track environment is selected randomly from following three settings: snow, sand/mud, or grass/leather and rocks, each screen has been drawn up in 64 colours on *Opus II*.

CARS II

Answer the journal's questions correctly and you'll pick up a nice fat cheque for your efforts. Make a wrong choice and you won't make the tabloids or get the money.

Left, if the more tops to go and the money will come rolling in. Lookin' a bit like Sphincter Junction, doesn't it? Bottom Left Good driving skills are essential to help cross the chasm. With the added turbo-boost you'll fly across!

After testing his skills at the rifle range (left), the player has to re-enact the final scenes from the film. The player must make Marty collect dramatically-timed logs without falling foul of the assorted obstacles that attempt to knock him off the train. Time is against you, though, and care must be taken not to get jolted or you'll have to start all over again.

BACK TO THE

BACK TO THE CINEMA

The last movie ended with nutty scientist Emmett Brown being transported back to 1955, leaving Marty, the film's hero, stranded in 1955.

Following a rather confusing episode with a 100-year-old letter and some grotty photographs, Marty works out that the Doc is killed a few weeks after arriving in the past. After digging out the time machine (which the Doc hid in an abandoned mine), Marty whizzes back a hundred years, calls himself Clint Eastwood (which leads to loads of wacky jokes), encounters, organ wars, and beats the bad guys, saves the Doc's life, then returns to 1955 in time to snag his girl. Not a film for the intellectual, but one that will drive parents mad as they try to explain the plot to their kids.

There's never been a decent game based on a film. Companies look out a fortune for a film's name and storyline only to turn out a game which has nothing to do with the movie.

I'd like to see Cinemasave have a bash at a movie license. If it was developed along the lines of the classic *A Game From The Orient*, then you could watch the story unfold and affect its outcome. Such a computer-movie environment would, to my mind, be the ideal vehicle by which to convert a movie license for the home computer.

STTP unfortunately fails to deliver the goods. The game contains four levels based on scenes from the film, with screens updating the plot between stages. This time Marty McFly has gone back in time to rescue his buddy Dr Emmett Brown, who is due to die two days after he posted a letter to Marty, which is 100 years before Marty receives it. Confused? You bet.

Level one starts with Dr Emmett Brown racing on

During breaks between levels and whenever a life is lost, a small scene-setter appears to prepare you for the next stage. In addition, these put out the missing parts of the film's story and keep you abreast of developments.

SCREEN SCENE

The first stage is split into two sub-games. The first is reminiscent of an old 16-bit budget game called *Kame*, and the second is set in a vertically-scrolling play area, with score-finding Indians to avoid.

HINTS BOX

To stop yourself falling off the train on level four hold the joystick down when you collect a log.

Try to shoot all the coloured ducks on the second level to get a bonus stage.

Avoid hitting the blue gags whenever they appear, they're the cavalry who'll help you by by shooting the Indians.

During the plate fight concentrate on eliminating one villain at a time.

THE FUTURE III

horseback to rescue his true love who's about to take a dive into a ravine. Plunging into ravines, colliding with the local wildlife or being shot by Indians results in a fall and a time penalty.

The scene then shifts to a shooting gallery in Hill Valley. The object here is to shoot a certain number of targets within a time limit. This section doesn't quite fit the style of the game, but is fun nonetheless.

Next is a nighttime wild-Isled Dog Tangle, the final bad guy. In the film Marty escapes death by using an oven door as body armour; the game goes a step further and gives our hero an unlimited number of plates to throw at the opposition as well. The oven door can take several hits, but once it's been destroyed Marty's vulnerable. This is definitely the most playable section, with nice touches such as the blind man who staggers through the mine field being led by his mastic guide dog.

Once Isled Dog's been defeated it only remains for Marty to get back to the

future. Owing to a stray arrow hitting a fuel line the DeLorean time machine can't reach 88mph, the speed at which the time circuits engage. To get around this the car has been strapped to the front of a stolen train, which will push it up to speed. Marty has to work his way to the front of the train avoiding mail hooks, collecting logs and bashing the odd train driver.

The in-game music includes the film theme, a rip-off of The Shadows' Apache, and a catchy version of ZZ Top's incidental tune. A few rough digitised screams make up the crude sound FX. The graphics are drawn in yellow and brown in keeping with the game's wild west theme. Although small at times, the characters and background sprites are attractive and well animated.

BTTF3 is a huge improvement over the first two licences. Unfortunately, a good games player could probably complete this within ten hours of buying it. Bore, and fun, this is a game for the kiddies.

Mark Patterson

There's an option to preview two of the levels - namely the plate dropping and the 'Try Your Luck' stages. As you gaze profanely at this table, bonus prizes, such as radios and teddy bears can be won.

BATTLESTORM

From the boxed-copy blurb, *Battlestorm* is a state-of-the-art game set to revolutionise the genre. The Ultimate shoot 'em up featuring 50 images per second, multi-directional scrolling, hyper speed and acceleration! permeate the

cover lines. It's a pity that the game fails to live up to such hype-up expectations.

It's not a bad game, but most of its features have been seen before and now look decidedly stale. If a new shoot 'em up wants to cut the mustard with today's game-hardened punters, it's got to offer something new and innovative. With *Battlestorm* it's just more of the same old tired formula.

The plot is as tired as the gameplay: four home planets have been forcefully occupied by an invading army of mutant-like aliens and the populace put to death. It's up to you to exact a bloody revenge by blasting them into so much space dust. Picking an Airborne Attack

Gift you have to locate and destroy four enemy headquarters and finally liberate your planet. Original, eh?

Featuring a bird's-eye view of the action, the game is made up of four different levels with two sections apiece. The first section in each level is a multi-directional blaster whilst the second is a vertically scrolling section. By pressing an attack wave of fighters, pods are revealed which, when collected, protect your craft from one hit by an enemy missile. Run out of pods and your ship takes a one way trip to oblivion. Certain pods add different weapons to the standard shot. Pulvers increase the speed of your shot while there's also the opportunity to collect heat-les, homing missiles, plasma bolts, speed ups and invincibility shields depending on the current level.

There are a variety of enemy ships to take out. Most follow simple attack paths and are somewhat predictable. An enemy Mother ship lays a trail of mines to make blowing it up a bit more difficult. However, by manoeuvring to one side it's possible to dodge anything it spews out. More of a challenge are the *Battlestorm* Saucers, big mothers with port and starboard gun turrets, which hunt you down relentlessly. A number of ground defenses also cause problems: multi-directional, tracking guns fill the sky with fire and trapdoor gun emplacements suddenly spring to life as you fly past.

Battlestorm is a competent shoot 'em up but nothing else. The graphics are not exceptional and the controls are hardly credible. There's a lot to do in each level, but even set at the hardest skill level it's a tad easy. As a full price game it can't hack it with the likes of *SWIV*. What for this game's debut at a budget price.

Ben Stingley

Battlestorm's hazards are many and varied. As well as the marauding mechs, ground defenses must be taken out.

GEM'X

Software imported from Germany and France is a fairly common occurrence, but *Gem'X* is the first time a game has been brought over from the Japanese. As can be expected, it's a wacky puzzle romp, which involves exercising the grey cells rather than the trigger finger, and as such it's one of the better ones. Once the usual plethora of scantly-clad and wide-eyed girls have been skipped past, the game proper begins with the setting up of a number of colour trials. The screen is split vertically into two key sections, with the player's area on the left-hand side of the screen, and a slightly rearranged series of blocks to the right. The aim of the game is to reposition the left-hand blocks into a pattern identical to those on the right, and when completed it's on to the next level. In addition, a sequence of coloured tiles is shown in the middle area of the screen, and shows the pattern the tiles cycle when selected.

When a block is selected, it changes from its present colour to two steps down the coloured sequence. In addition, any tiles surrounding the selected block

are similarly switched to the next colour in their sequence – and to add to your problems, only a set number of moves are allowed. As puzzle games go, *Gem'X* is adequate. Its gameplay tends to get a little repetitive, and whilst the screens are initially addictive, the long-term appeal is extremely limited. Not bad, but only for a short time.

Calls cost 33p (cheap rate) and 44p (at all other times) per minute including VAT. For details of winners please send an SAE to: Pepperoni Winners, PO Box 1840, London, NW1 8HG. Please ask your parents permission before you call.

Average length of the call is 5.5 minutes and we advise that you ring at cheap rate.

THE POWER

Demonware return to the puzzle game field with this unusual offering, which once again uses the title of a Snap revival. With the baseline from the original hit trumping away in the background, occasionally interrupted by a sampled shout, the object of *The Power* is to guide a small head along the walls of a surrounding play area in an attempt to make contact with a similar-looking head with a bow on top – presumably the female object of the former boy's intentions. However, before the proposed meeting can take place, the round hero must be able to collect a pre-determined number of hearts to prove his love for the little female. However, as our hero can only travel in a straight line along the wall or at a right-angle from it, actually reaching the girl involves a lot of thinking and rearranging of obstacles – all within an ever-decreasing time limit.

Between each stage, Pangloss screens appear depicting the two 'heads' love for each other, but then it's back to business.

SCREEN SCENE

Despite its simple gameplay, *The Power* proves to be remarkably addictive. The puzzle element is the most addictive I have seen for a while, with some really nasty problems on the later levels – and these are made harder with the addition of blocks that cancel each other out. As with most of the puzzle genre, though, its lasting appeal is dubious, with very little variety in the levels. To give the programmers credit, they have attempted to rectify this with the addition of extra play modes, but even these can't stop *The Power* from being short-term fun.

WHITE SHARK

With the softshop success of *Cops Up* and *Final Countdown*, German soft-cas, Demonware have lined up an impressive list of new games for the coming months. First to hit the softshelves is *White Shark*, a horizontally-scrolling shoot 'em up set over six contrasting levels featuring as weird and wonderful a mixture of alien attack craft as you've ever likely to meet.

Forget the plot (there isn't one), just turn off your brain, jack in the joystick and blast away. The game offers the chance to customise your futuristic fighter with an array of different weapon systems, ranging from a standard one shot blaster through to heat seeking missiles and cloud-like bombs. Four weapons come as standard although their combined firepower is rather weak and ineffective. As only four additional weapons can be carried, these have to be chosen with care. Certain types of weapon are more effective in taking out alien attack waves than others; by playing each level a number of times it gradually becomes clear which are the correct ones for each section. Once you're equipped your ship, it's straight into the action.

Level one pits your attack ship against waves of oncoming choppers, fighter planes, and – is graphically reminiscent of both *U.N. Squadron* and *Sidearms*. It's not too difficult to fight your way through this section, even the end-of-level cruise is a bit of a walk-over. Things hot up by the second level. The player has to navigate his craft through a cave system with overhanging rock formations and narrow passages to negotiate. It's not that easy, though, as multi-coloured gam-like ships attack relentlessly. There's also a jungle level and an Alien-esque section where the aliens unfold from its surrounding walls. The game really comes into its own in two-

influenced by *2-G* and numerous other shoot 'em ups, *White Shark* offers fast and furious blasting action.

player mode, with a smaller attack-craft joining the fray. It's a girl-sized version of the original fighter with proportionally scaled down weapons and missiles. Although it's not as powerful, the smaller ship is more adept at dodging over-hanging beams and flying down the maze-like systems of passages.

White Shark doesn't push the Amiga's capabilities at all. The graphics are merely competent, the sounds passable, but the gameplay is very addictive, especially when set up for two players. A fun blast, but with limited appeal.

AFTERBURNER

Afterburner bears very little resemblance to the arcade version which was one of the best aerial shoot 'em ups of recent years. However, Top Gun fans may well be interested by this battle in the skies. Taking off from the bridge of a ship, the game leads swiftly into combat. The first stage is set around a clear blue sky with nothing to cloud the horizon except foe-

lie aircraft. Shooting them down is no easy task. Be careful to use your ammunition wisely as it does not last forever. Flashing red lights at the top of the screen alert you to planes which are telling you. The only way to shake them off is to perform a 260 degree turn, done by rapidly moving the joystick from side to side. To increase speed, press the space bar twice in quick succession, but remember that after a fixed period your speed will slow down. Cannons are always a handy item to have around, and they are activated automatically when

an enemy appears on the screen. How consistent? Refueling is controlled by the computer and also equips you with extra missiles. Bonus lives are awarded as you progress into the game.

Really one of the worst computer games ever, Afterburner is fast forgotten.

Afterburner is a great battle in the skies and will doubtless have appeal for fans of this type of game. However, it is quite difficult to avoid being shot down as head-on enemy planes are hidden from view, which leaves you vulnerable to attack.

Those with Komarcare tendencies will love the spectacular ball of fire and flame that fills the screen when your number is up.

DEATH/THE HIT SQUAD £7.99 OUT NOW 59%

Money too tight to mention? Bank balance edging further into the red? Fear not! Fiona Keating takes a monthly look at cut-price budget and compilation games that won't burn a hole in your pocket.

ARKANOID: REVENGE OF DON

Arkanoid II was a superior update of those rudimentary table tennis games that used to annoy you in pubs. The game has many additional extras, gizmos and gadgets that turn it up, including an awe-inspiring story line. ZARG, a huge alien spacecraft, has very nastily alienated the universe. It is known to contain the devilish, death-defying DON, a being supposed to have been destroyed forty thousand years ago in the Arkanoid spacecraft. It is up to you (of course) to save the fate of the entire solar system! Your futuristic spacecraft, which is really looks like a lizard-shaped tough-pedal, is controlled by moving the mouse from left to right. Use it to deflect the energy ball which breaks down the wall confronting you. Energy capsules are released upon destruction of the bricks which brash from the wall. Each has a different power, denoted by a letter painted on its side. These powers include: splitting the ball

into eight separate components, which is good for as the bricks shatter mighty quickly; expanding the flail to give a greater chance of deflecting the energy ball; and a laser which shoots through bricks and aliens. Arkanoid II is playable and fairly entertaining but nonetheless dated. The graphics and sounds are on-par and the sound is of coin-op quality - although the original never had much in the way of music! This game is definitely value for money and will probably have appeal for newcomers but not for the experienced or jaded player.

DEATH/THE HIT SQUAD £7.99 OUT NOW 73%

BATMAN THE CAPED CRUSADER

Solving devilishly hard puzzles and riding Gotham City of Kees is all in a day's work for Batman. The adventures of the super hero continue apace in this arcade adventure game.

The game consists of two plots involving Batman's deadliest enemies - The Penguin and The Joker. In The Penguin puzzle, the bird has really gone queer. He plans to take over the world using an army of robotic penguins! As Batman

you have to close down the hidden master control computer and put an end to this evil conspiracy in the Joker realm, the laughing jester has kidnapped Robin and has

plans to blow him up. Saving your number two is not an easy task as you roam the streets of Gotham City looking for the Boy Blunder. To solve these two squanderns makes the old grey matter work overtime and the race against time gets the adrenalin going.

The comic strip style graphics are excellent and add to the overall appeal of the game. As the muscled-bound Batman, the player moves to different locations such as the Batcave (in the street of Gotham City, picking up clues and objects to help in your quest. Some objects are especially handy. The goodies will separate your energy and the training shoe make Batman move like a maniac on speed. The utility screen can be obtained by pulling down the joystick and pressing fire. This reveals the objects collected and energy status - the face of Batman early turned into a skull as his life drains away.

Batman has a great deal to offer, a snazzy soundtrack, good animation and interesting gameplay. However, the puzzles are very difficult to solve and the lack of 'Spot! Pow!' when Batman biffs somebody makes it a little disappointing. A must for big kids.

OCEAN/THE HIT SQUAD £7.99 OUT NOW 89%

FAST FOOD

A game that satisfies even the most gargantuan appetite. Eat as many delectable burgers, chickens and milkshakes as you like over 30 different mazes. This is definitely not to be played on an empty stomach.

Dizzy, who is as round as he deserves to be, has to eat all the food in the maze to proceed to the next level. The chickens are the hardest to catch. Not surprisingly, they don't want to be eaten and waddle as fast as they can out of the way. Luckily, they are fairly dim and the tasty little morsels can be subdued. Burgers, apparently are blind, so wait for them with your mouth wide open. Pizzas are polished off just as easily. Mistakes are just begging to be swallowed up, so don't waste your jay in these little mazes. Watch out for the monsters who are out to stop your chomping. The items that can help you eat are magic boots to increase your speed, relax to slow down the monsters, mustard to freeze them and ketchup to get rid of them. Furthermore, look out for shields which let Dizzy behave graciously by eating the monsters.

Throughout, the graphics are colourful and lively. Locations are picturesque settings such as the fast food house and amongst the flower beds. Being able to catch the monsters or even better still, to eat them, is one of the highlights of this game.

Fast Food is a highly addictive game. The wacky cartoon characters are very entertaining and bound to put you in a good mood. The game may not appeal to those who prefer blood and guts entertainment. Definitely for the less gore-orientated punter.

OCEAN/ARTIST £6.99 OUT NOW 82%

WIZBALL

Hailed by many as one of the great Amiga classics, Wizball contains imaginative storyline, graphics and gameplay. Wiz and his cat of many talents have lived very happily in the brightly coloured Wizerd. That is, until the dastardly Zark and his terrible minions have rendered all landscapes grey and colourless. The object of the game is to make Wizerd technicolour again. Collecting gems for special powers while destroying the alien forces of Zark will help to achieve the task ahead.

Wizball is maneuvered by the joystick and a fair amount of practice is needed to attain a good control over it. Otherwise you will find yourself unable to pry away from aliens - contact with them results in the screen turning into coloured blocks, similar to those used on TV to disguise faces.

The landscapes in Wizerd are made up of three colours - green, red and blue. To restore the original colour, shoot the bubbles and then use cat to collect the droplets of chemicals as they fall to the ground.

To collect gems which bestow special powers, kill aliens and collect the green pearls that they leave behind. On passing over these, magical properties beyond your wildest dreams are yours. They include a Wiz super-beam weapon, immunity for a certain period, and the ability to kill every spirit in sight.

Wizball is a very imaginative game which uses novel ideas and has interesting graphics. How many other games has a green blob as its central character? Different landscapes entered through tubes and pipes literally add an extra dimension, as do the nightmarish snake monsters. Wizball will be around for a long time to come because of its many features and entices that keep boredom at bay.

£259

Avid Chaos Killer, Ian Cogings from Exeter, takes a breather from his bouts of dragon-busting to offer useful advice.

CHAOS ST

PRISON LEVEL ONE

Creatures – None

Items – None

Twenty-four new Heroes are found here, twenty-two of which are easily found and two of which are hidden. All of them are very powerful in levels, characteristics and skills but have no equipment. There are two illusory walls which lead to stairs.

The two small enclosures can only be reached from below. If you want to have a Razal Shadow Warrior you must open the door in front of him by examining some of the undead fellows. If you want a Lor Champion you should avoid the undead; you can't have both characters in a party.

PRISON LEVEL 2

Creatures – Mummies

Items – None

Despite what the text at the start claims, there is a second level, complete with mummies. Before you reach the Razal you come to nine rock piles, use the poison gas spell on them. In the compartment on the way to Lor there are 22 mummies which should be destroyed with fireball spells.

With over more to it than the original Dungeon Master, Chaos-Killer Back offers even more nasty creatures and puzzles. If you're prepared for the unexpected.

PLAY TO WIN

GENERAL HINTS Be sure to use all your characters in combat. Consume foodstuffs and use light spells whenever possible. Don't target or extinguish torches when the party goes to sleep.

Scrolls have little use other than providing guidance and instructions—one exception is the Magic Map scroll. You might try using scrolls as path markers or to trigger pressure plates. If one of your party dies don't forget to collect their bones so they can be reanimated.

Learn which characters can cast spells. Eventually you learn which spells are most effective against which monsters. Don't carry too much unnecessary equipment. If the level value turns yellow or red you're becoming hungry and tired faster.

If a hero doesn't have enough Mana to cast a spell, stand a few minutes, sleep, then finish the spell. You should pre-cast spells so they're ready in case of surprises.

Weapons left behind by Death Knights and the Others may be cursed, so it's best to avoid them.

Most Giggles items will kill you, apart from equipment which was stolen from you. So be very careful!

Make the most of whatever weapons you can find, but beware the items the Giggles have hidden. Some may sap your energy — so don't be too greedy.

By learning the ways of Onyx magic, the massive creatures can be destroyed quickly and efficiently.

TRIKES BACK

THE CELLAR LEVEL 1

Creatures — Giggles, Armoured Worms, Red Dragon, Giggler Items — Moonstone

FOOD	WEAPONS	ARMOUR	KEYS	MISCELLANEOUS
Shark	5 rods	Leather Jerkin	3 Iron	3 Bombers
Wool Rounds	Papier	Leather Pants	Onyx	2 sets of bones
Dragon Steaks	2 Slayers	Hazeln	Solid	Magic Box 8
	Sling	Midnight Mail		500 potion (1)
	Claw	Midnight Helm		2 VOR potion (2)
	Rod	Basket		500 potion (5)
	Bow			Magic Box (2)
				FUL bombs (2)
				2 FUL bombs (4)
				FUL bomb (1)
				500 coin
				Steel
				Calista

Not all items are safe to collect. Some Giggler treasure will reduce your strength, so it's best to avoid anything that doesn't belong to you.

MONSTERS

The Armoured Worms are rather like the Purple Worms in Dungeon Master, but more powerful. They can appear in pairs and are vulnerable to most weapons and fireballs. The Giggles try to steal your equipment and must be destroyed immediately. Arranged just remains you can find your stolen weapons as well as some other items.

The Dragon takes an incredible amount

of damage before it dies. Most forms of attack are effective against it, but use a fireball if you have to get in close. Dragons always provide ten pieces of dragon steak as well as treasure.

NEUTRAL SECTION

Plunge into one of the pits and you will need to drop all your equipment to free yourself. Look for the force field that will transport you back to the fountain in Neutral level five.

KU SECTION

Kill the Dragon for its treasure and the way to the next level. Though an illusory wall near a button. Press the button then go through the wall. The door inside can be opened or closed with an Onyx key.

The other button leads to a teleporter which leads to level three.

ROS SECTION

There's an illusory wall blocking the staircase and another blocking a teleporter which leads to the junction.

NETA SECTION

Do not step on the square with the chest, you'll become trapped and then come under attack from a horde of worms. The walls occasionally open up to let some worms in. Close them as soon as the beasts have been killed.

DAIN SECTION

A panel is blocking the stairs which lead up. Press the button to remove the panel. There's an illusory wall which leads to a teleporter.

PLAY TO
WIN

STAR CONTROL

Star Commander, Mark 'Twikki-Kryton Head' Patterson brings you confidential secrets of the Alliance and Hierarchy ships.

UB-QUAN DREADNAUGHT

This ship is capable of destroying almost any Alliance craft. Remember that each fighter launched costs one crew member; it's easy to get carried away and leave your ship with a skeleton crew. The only serious threat comes from the Garthian craft.

MYCON PODSHIP

Even though this ship comes with a large crew and lots of fuel, it can only fire its weapon beam without re-charging. The plasma coils it has can be destroyed by shooting, or by shields. Run if none of the options are open to you. It has trouble against the Yehat fighters.

ILWRATH

Remember you can remember where you are, the Ilwrath's cloaking device is invaluable. Breaking up an on-coming craft is better than a frontal assault. Cherjesu craft are particularly useful against this.

VUX INTRUDER

Be careful when using the Vux's laser. It drains energy incredibly fast! When facing an enemy with a short range weapon wait for it to close in before releasing a cluster of impels and opening up with the laser.

SPATHI DISCRIMINATOR

The Spathi is the weakest Hierarchy ship. Its speed and rear-firing missiles are its only advantages. Fly past the enemy at close range and fire the missiles in groups of three; it's the only way to win with this ship.

ANDROSYNTH GUARDIAN

The only use for the Androsynth's main weapon is defense. A cluster of battles will deter any close attacking enemy. Comet mode is best employed at close range as nothing can cut you off. The Androsynth in heavy laser mode has no trouble in knocking out the Androsynth comet.

UMGAH DRONE

By keeping its anti-matter core active it acts as a shield as well as a weapon. Only Cherjesu and Minnirids (yes, we have spell it right) craft are capable of firing around the anti-matter core.

CHERJESU

By launching two D.O.O.s at the start of a battle, a Cherjesu can successfully disable most enemy craft. Never let the opposition get in-close. The Vux stands the best chance against this ship.

YEHAT

With its shields and dual cannons, the Yehat can destroy most larger craft. Fire the can-

non in short bursts so you're left with enough fuel to activate the shields. Very good against the Mycon podship.

MMHHMMHMM

Against a slow enemy the Minnirids can stay in fast mode just using its homing missiles. For tougher opposition the heavy laser is extremely effective. The Androsynth is the best ship to send against this craft.

ARSLQULALELAY

By utilizing its homing laser, warpdrive and teleporter, this ship can be very potent. The best tactic is to fly in fast then open up with the laser, teleporting out as soon as the enemy reacts.

SYREIN

Attacking an enemy ship using the Syrein's laser is futile. Attempt to hypnotize the crew, collect them, then attack. Flanning away is usually the best tactic for this craft. Avoid the Ub-Quan Dreadnaughts at all costs.

EARTHLING CRUISER

This ship stands the best chance against the Dreadnaughts. Its defensive laser is capable of knocking out the Ub-Quan fighter. Distance is the best tactic as its long range missiles are both powerful and accurate.

SHIFOXTI

Far from winning a battle by using this ship's laser. Use its speed to get in behind the enemy then detonate.

GENERAL No ship is completely perfect. Exploit enemy weaknesses such as speed and firing rate. The Hierarchy have the best ships, but the Alliance ships can be very effective if used tactically.

Slow ships like the Cherjesu and the Dreadnaughts can't get away from a planet's gravitational field, so be careful.

BACK TO THE FUTURE III

Type these in during the story before the levels starts...

Level 1: Rotten Chest
Level 2: Lousy Chest
Level 3: Low Down Chest

Q Brandy R Treasure S Gold egg T Wood U Motor V Patrol W Ignition Key

PLAY TO WIN CAPTIVE

THE FOUR SQUARE CIRCLE MOVE

Use this against slow enemies. Get round the side of a group of bad guys and close to within four squares. As they turn towards you, sidestep and turn to face the square you just left. Wait for them to move into that square then open fire. Repeat this move until all the bad guys are dead.

THE BIG SQUARE CIRCLE TACTIC

Move three squares away from the enemy then turn and fire. Circle around them using this move.

CRUSH-UP

Groups of monsters can be crushed if you land on them when you go down a ladder.

SHOT IN THE BACK

Occasionally you come across monsters guarding ladders. Once they spot you they pace up and down the ladder making it impossible. Drop a camera near them and run away while keeping an eye on what they're doing. Wait until the monster has gone up the ladder then run towards him firing constantly.

You'll need to use this tactic in the space station.

SUICIDE

Monsters will quite often end up shooting themselves, especially if they're lined up. Tanks, which are difficult to destroy head on, usually bounce their shells off walls and back on to themselves.

Z OUT

This is probably the easiest-to-use cheat ever. Press J at anytime during play to skip levels. J and R together for infinite lives. More of a bug than a cheat sometimes.

MONTY PYTHON

If you're having problems with your gamblers, cheaters and keep left signs in Virgin's Monty Python try entering your name as SCMPH on the high score table. You should now restart from the level you died.

FOOTBALL CRAZY

The Most AUTHENTIC MULTI-MANAGER Football Game Has: Finally Arrived. After 2 Years Research & Development The Ultimate Game is Ready And Waiting To Test Your Skills. FEATURES INCLUDE:-

Multi-Manager Game for 1 to 4 Players.

Full UK and European Cupplay including FA, League, Juvet/Date, Lylestad Cup, European, Cup Winners and FA Cup. All Cup matches are played to the proper rules. eg 3 Leg Two, Extra Time, Away Goal Rule, Limited Chases, Penalties, etc.

Complete league line up with 20 1st division teams and 24 in the 2nd, 3rd and 4th level of soccer Play-offs with cupholders.

All team summaries are the real ones for all 92 clubs (CURRENT season) clubs.

History Records are maintained for 6 seasons with the ability to call-up all previous results against your next opponent.

A Lively Transfer Market to Buy and Sell Players with an end of season transfer Player Loans, Free Transfers with Approvals & Offers on players or transfers.

Managers can be sacked or offered jobs at other teams.

All screens are displayed in a presentation, which is easy to use and comfortable to read. PRINTED facilities also exist.

Complete Instructions, for the beginners, are provided in a 16 page booklet.

...and would you believe it doesn't stop there! We have included many other fine details which are just impossible to list in this space. They include all the regular features you would expect the best quality, saving your game, player moves plus much, much more. The most genuine implementation of a Football Managers basic season awaits you for only £19.95.

Take Your Team To The Top And
Win The Double.

Or Are You Good Enough To Win The
Quadruple Crown, Never Yet Achieved
By A League Team Manager.

Available for the Amiga & All Atari ST's.

IPG Version Coming Soon.

PS TRUMPBOARD FOR AMIGA 1500 & 2000

The PS Trumpboard is the top selling SCSI hard drive controller. Representing the
latest in technology directly from the USA, it will fit in either the A1500 or A2000 - It is
the only controller which will support IBM, Amiga and Apple MAC partitions on one
hard disk. This allows you to run software for the three main hardware platforms in one
machine. For more compatibility problems, only one computer can do this.

HELPLINE

ENQUIRIES

KING'S QUEST 1

I know that somewhere in this game there is a pouch full of diamonds, but where? Please help me.
Peter John, 21

GOLD OF THE AZTECS

I can't get past the second screen on stage two. Could someone please help me with this by giving me a poke for infinite lives or tell me how to succeed?
Wendy Rogers, 20

CARTHAGE

Can anyone help me? I just can't get my armies into confrontation.
SuperCatchington, 23

FANTASY WORLD DIZZY

I can't get past the first dragon. I can get past the Amnig but not the broken bridge. I've searched the castle for objects but can't find anything. Is there a cheat?
Pimp tyward, 24

TOTAL RECALL

Can someone put me out of my misery? I have reached level three but I keep getting shot. Any tips or cheats would be greatly appreciated.
Alec Francis, 25

Z-OUT

I can get to the guardian at the end of the level three, but when the circle of bullets comes out I don't know what to do. Will somebody tell me how to kill him?
D. Golan, 26

DRAGON'S LAIR

I have been playing Dragon's Lair now for ages. Unfortunately, I can't get past the first set of rapids after the whirpools on disk three. Help!
Cassie Ren, 27

FIGHTER BOMBER

Here's a fighter pilot in need! Could someone tell me how to load the Maverick missiles? The 'S' key only

looks like a bomb. Please hurry or I'm going to get shot down.
Devil Master, 28

AWESOME

After playing Awesome for the last couple of weeks, I have managed to reach the first planet, but can only manage to get halfway to the second. A cheat for infinite energy would do nicely.
M. Halsey, 29

ROBOCOP 2

I need a poke to complete this game. It's just so hard. Please reply as I would like to complete it.
Lee Carter, 30

EVERYTHING BUT THE KITCHEN SINK 2

I am having a bit of trouble with a few games. Here's the list: Ghosts n' Goblins, Sheep, Pac-Mania, Can Can 2, The Last Patrol (I already know what to do at the first village, but a cheat for not losing your men would be nice) and last of all, everyone's favourite game, Hollywood Poker Pro (I know a cheat which says when the dice light goes out reset, but I can't find the first two ladies any easier).
A Venetia Gennepoyre, 31

BAT

I am having trouble with Jet-Set's brilliant adventure, Bat. After many hours of play it seems to be at a dead end. I have got Lydia as a companion, but I cannot get into the derelict building, The Xilo club, the airport or into Criss Karstakov's building. After traversing the city many times, I cannot find any way to get into the above places and I am becoming desperate for help.
Raf Williams, 32

XENON 1 & 2

I am looking for a cheat for both the Bitmag's Xenon games.
Rob Williams, 33

MAD PROFESSOR MARIANI

Is there a cheat for more lives? We can get to the Mystery Lab, but it's not long before we're sent to the loony bin!
Bobby Mann, 34

TV SPORTS FOOTBALL

This is a good game but the length of the matches (1 hour) puts me off. Is there a cheat or poke or something I can type in to make the matches go for at least half the normal time?
Jay Gooday, 35

OOOPS-UP!

I've got all the codes, but I'd like infinite lives and time because even with the codes it takes ages to beat in the hi-score table, and get back into the game again. Yours!
T. Hughes, 36

STRIDER II

This is one hard game as it sends you back to the beginning of the level when you lose a life! Infinite energy or level-up please - I can't get off level 2!
T. Hughes, 37

BEACH VOLLEY

I am at the end of my sanity trying to work out some form of level skip for this game. Can anyone help?
Tom Corrado, 38

NEBULUS 3

I have a cheat for Madbuter but now this sequel has come out which is even harder. I'd appreciate any cheats or hints.
Paul Jones, 39

LAST NINJA 2

When the game starts, I go through the curtains, behind the instruments, into a spine. Once I've killed the man in there I'm stuck as I can't get out of the building. Has anyone got a cheat or a level skip?
Leon S. 200

UNREAL

Could someone please give me a cheat for infinite lives? The game has some tasty graphics, but we can't get past level two.
Jonathan Gannon, 40

KID GLOVES

I've got to the 23rd level of this game without the cheat on. I'm now finding it

hard going, as a cheat would come in handy.

James Kays, 22

BUFF AND READY

I am stuck on level 2 in the space adventure. Has anyone got a cheat for Infinitia II yet?

Poon Siew, 22

TORVAK THE WARRIOR

This game's just so infuriating! I need an infinite energy cheat, preferably one that doesn't make you jump back when you're hit.

T. Hughes, 24

RESPONSES

TURRICAN (G24)

When on the high score table, type **BLUGMOLES** (no spaces) for 10 lives and full equipment.

Andrew Barnes, Northampton.

PLAYER MANAGER (G25)

Here are some hints on gaining money. I have earned over 55,000H by using these methods!

1. Buy a few young, cheap players and keep them in the squad for a whole season. Next year, their price will have increased and you should have no trouble selling them for a huge profit.
2. Only buy players with very high agility ratings, as this affects all their other attributes. If agility is extremely high (about 99%), expect the player to become an excellent footballer - given a season or two.
3. Try and keep in the Cup/Fix as long as possible, as this is one of the best ways to gain plenty of money. Even if you lose in the finals, you will still receive the gate receipt money. Of course, winning looks a lot better on your season records.

G. St. Henry, Bradford

LEISURE SUIT LARRY 3 (G33)

When you receive your divorce papers, read them, and you find that Suzy's spousal support falls out. You now get more points than you would do if you gave the divorce to Paul without reading them before hand.

As for Chip 'n' Dale, you must go there before entering the Bamboo bar.

Wait. Walk up to the door and talk to the man. Give him your tip you took from the piano and he will let you in. When inside, sit down at the empty table and watch the show. Throw your parties to Dan. When he sits down at your table, talk to him and follow the line of conversation.

James Wheatcroft, London.

TEENAGE MUTANT NINJA TURTLES (G19)

Here's something that might help. When entering the protection routine, type 9999 first time, 1599 the second, and the correct number the third time. Now, you'll find that **HELP** toggles involuntarily on/off. If you lose a turtle pressing **HELP** restores all of them to full energy, even dead ones.

Andrew Gary Northampton.

JAMES POND (H3)

The sunglasses are at the bottom of the boat on Level Three. There's a narrow passage which goes down into a corridor which is where you'll find the glasses.

The cheat: Try typing in **JUNKYARD** (followed by a Return) while playing the game. In play, hitting Return will give you a protective fairy. Hitting 'D' will make the locks disappear off the next mission pipes.

Philip Goodrich, Walsall-on-Sau.

CORPORATION (H4)

To call up the psychic powers, you must first be controlling a human agent. Click onto the head part of the damage display indicator (on the left). Up pops the strange three-eye icon. The psychic powers are controlled in much the same way as the casting of spells in *Dungeon Master*. You may click on each eye three times, the first eye has three positions that dictate the strength of the effect: 1. weak, 2. medium effect, 3. strong effect. The second eye says whether the effect is: 1. good, 2. bad. The third eye says whether the effect is: 1. on you, 2. near you, 3. far away from you.

Finally, you must click the arrow underneath to cast the 'spell'.

Chris Horton, Lichfield.

RICK DANGEROUS (H9)

Enter your name as **POCKY** for a level select screen.

D. Newman, Southampton.

HOW TO USE THE HELPLINE

IT'S EASY. Just send in your letter, marking your envelope with the appropriate code number if you are sending a response or mark it 'Enquiry' if you need some help. Post your letters to: **Play to Win Helpline, CU, Priority Court, 30-32 Farringdon Lane, London EC1R 3AU.** If you are making an enquiry include a few lines explaining why you need a poke, cheat, help etc.

If you are replying to any of these enquiries, don't forget to mark your letter with the reference code for the person you are responding to. If you send in more than one enquiry, please put each one on a separate sheet of paper. If you send in a response but have an enquiry too include them on separate sheets. That way we can file everything in neat alphabetical order.

HELPLINE

CU's adventure and RPG guru, Matt Regan, offers handy tips and advice for hard-pressed game-players everywhere.

INTERACTION

Welcome to this month's Adventure Helpline. The big news is the imminent release of Bard's Tale III (from the Amiga, which looks set to repeat the success of the earlier games in the series, I expect to be delayed with requests for help, so I'll start playing it as soon as it arrives).

Eye Of The Beholder arrived too late for review this issue, but I've played it a little. I'm happy to report that it more than lives up to expectations! Another great game, released this month is *Monkey Island*, which is the funniest adventure since *Fishin'*—my humble opinion. Don't miss this excellent Lucasfilm game.

The sim/frog is a bit bleak at the moment, but it will no doubt pick up soon — like the adventure market, it tends to come in spans. *Midwinter* II seems to be a vast improvement over the first (which was hardly a bad game), with dozens of missions and modes of transport to pick. Anyway, let's get on with the questions and answers, as there are lots to get through.

INPUT

LEGEND OF FAERGHAIL

Kevin Hornsby of Soundtrope is in a real state with his *Dart's Tale* clone. He's got the gems, the Capons, and the Keycraft, he's put them together to form the Staff, but can't work out what to do with it! Can anyone help?

through trying to think of a solution!

IAK MURKRAKEN

Stephen Quinn of Dublin is another person who just isn't coming up with the answer he needs. He's stuck in this great adventure and doesn't know how to proceed! He has collected the blue and yellow crystals but can't win the little game. Does anyone know how to do it?

BLOODWYCH

Peoplenote is playing this RPG from Minimals, and Paul Handy of Sheffield is stuck! He's entered the Moon Tower, climbed a flight of stairs and gone into a large room. Unfortunately he can't get out of it! Two pillars block the exits, and he's run out of ideas about how to get ahead. He pleads for some help!

OUTPUT

MANIAC MANSION

Carry Hume of Tasmania has come to the rescue of Simon Britton who couldn't get past Weird Ed. Smashing the piggy bank to reveal the door usually attracts his attention, and while he's entering the vaulted to the cell, another character can grab the money. Then play the *Melrose* game in the arcade, and the highscore is the code to the planet lab!

OOZE

Another person desperate for advice is Mark Lewis of Tootogian, Ovens. He wants my advice at all, as he says that he can't get any where at all. He also failed to know the answer to the riddle in the early part of the game. Does a successful adventurer out there know the answer?

OPERATION STEALTH

Bruce Miller of East Lothian is stuck at the very beginning of the game. Having collected the coin he's tried to forge a passport, but the official won't let him past! Come on, Bruce, this one's easy. Use the coin to get a newspaper, read it to find out which country's in favour at the moment, then forge a passport of that nationality. No secret, said that done!

POLICE QUEST II

Peter and James Arson of Betty, North Yorkshire, every time he goes down into the tower he dies because of breathing poisonous gas. Is there a gas mask or something similar to protect him? If you know, please write in because James says that his head hurts

PLAY TO
WIN

DUNGEON MASTER

Ricky Jackson from Lichfield, Staffs, is having problems on level seven - he can't open the second force-field door. Well, that's because you need the next Ra key, and collecting them is the whole point of the game. They are scattered around the dungeon and give access to the Firestaff, the only Magic Item capable of defeating Lord Chaos. So descend and keep hunting, Ricky.

HOW TO USE THE ADVENTURE HELPLINE

Write to me, Matt Regan, at Adventure Helpline, CU Amiga, Priory Court, 30-32 Farnington Lane, London EC1R 3NU, with your problems and any useful hints you can give in response to those readers (especially in these pages). Make sure you include your full name and address, and I will do my best to get back to you personally.

AN A TO Z OF CLASSIC GAMES

IN THE SECOND INSTALLMENT OF OUR TWO-PART FEATURE, CU TAKES A STROLL DOWN MEMORY LANE AND LOOKS AT SOME OF THE BEST AMIGA GAMES.

RAINBOW ISLANDS

Unfortunately, this brilliant coin-op conversion was held up after wrangles between Microspace and Taito. After a while, though, Ocean secured the rights to release Oaxley's conversion and the game won much critical acclaim. The sequel is *Bubble Bobble*. *Rainbow Islands* is a cutesy platform romp with plenty to see and jump over. With seven large levels, and numerous hidden secrets, this is the ultimate platform romp and is an essential buy.

RICK D II

Microspace's square-jawed hero returned last year in

another five levels of mayhem. Armed with a laser and a few explosives, Rick encounters all manner of Flash Gordon-esque creatures and robots as he attempts to reach the elusive Fat Man. It's basically a slightly touched-up version of the first game, but, even so, it's one of the better platform titles.

ROBOCOP II

That popular metallic law enforcer returned in a seven-stage blast compiling a number of game styles. In terms of gameplay, not a lot has changed since the first game, but programmers, Special FX, have tweaked the playability and the graphics are superb. In all, a fine time to-in. Amazing fun.

ROCKET RANGER

Another classic from the Oceanware fold, and probably their best release to date. Not quite as polished as, say, *Crash*, *Rocket Ranger* is an all-action race against time which hasn't dated one bit. The sub-games get progressively harder, ensuring that the game isn't a walk-over, and it has that elusive 'one more go' feel which so many games lack.

SIMULCRA

Another from the Graffiti stable, *Simulcra* is a fast 3D shoot 'em up with a series of matrices to complete. This involves taking out a group of

One of the best conversions of all time, Graffiti and Ocean's *Rainbow Islands* is probably the ultimate platform game for the Amiga. It has got addictive gameplay, unique graphics - everything, in fact!

generators, but the addition of force fields and enemy planes and tanks makes things harder. By no means a classic, but a fast and furious blast.

SPEEDBALL II

This sequel to the classic

Speedball far exceeded our expectations, with its superb graphics and advanced features.

Every aspect of the original game has been improved upon, with the addition of a larger pitch, faster scrolling and a multi-segment option. In a nutshell, probably the best all-round game for the Amiga.

SUPER HANG-ON

OK, so it's knocking on a bit now, but there are still very few race games that can touch this. The graphics are large and clear and the track detail and obstacles have so far been unrivalled. There are a large number of tracks to risk your way around, and *Super Hang-On*'s age and

playability ensures that it is a renowned classic.

SWIV

An odd title, but a superb shoot 'em up. Imagine Virgin's brilliant *Salamander* viewed from overhead with a number of new enhancements. Featuring a superb 'load as you go' loading system, *SWIV* is easily Ocean's best game yet.

TORVAK THE WARRIOR

Drawing ideas from *Hastan* and *Legendary Axe*, *Torvak The Warrior* is a horizontally-scrolling beat 'em up with an axe-wielding muscle man as its star. Guiding Torvak you must hack your way through several stages, worth of baddies until you reach the final guardian and the end of the game. The graphics are of Core's typically high standard, and the gameplay is simple but enjoyable.

TURRIKAN II

Turrikán returns for another epic of destruction. This sequel sports better graphics than that of the original, with shaded backdrops and a

order variety of aliens, but the basic gameplay remains intact. One of the best Amiga shoot 'em ups ever.

UNREAL

A quest for justice, a burning sword and a muscle bound hero are the main ingredients of this arcade/adventure. Puzzles and sword swinging action make up the gameplay as our hero travels through many different lands. A side scoring of temples and fantastic graphics help round off an arcade adventure which no fan of this style should go without.

ULTIMA V

The most recent addition to the Amiga side of this series, Ultima V takes the game environment to it's most detailed level to date. Programmed by Lord British, this is the best Ultima yet! A game which shouldn't be missed by any fan of this series.

VIRUS

The first real Archimedes game hit the Amiga with a bang. Though slightly slower, the Amiga version retained all the features of its Archi predecessor. Visually and surely stunning, the only difficulty comes with controlling the

Z-OUT

The follow-up to the excellent X-Out, Z-Out is another six levels of frantic action. As can be expected, there is plenty to see and shoot and lots of extra weapons to collect, and the attack waves come fast and furiously. A good shoot 'em up which is far from original but extremely playable.

ZOMBIE

Based on the Supermarket scene in Romero's Day Of The Dead, Ubisoft's Zombie won't much favour in the splatstick scene community. You're four strong team have to overcome hordes of undead in an attempt to gain fuel for their down helicopter. With plenty of plays on modern commercialism, Zombie is an excellent arcade adventure.

peculiar craft you're given. That aside this is one weird shoot 'em up.

YIZ

Almost too recent to become a classic, YI takes computer shoot humour right round the U-bag. Preliminary, smut and lewdness abound in race off between three of YI's most successful characters. Over eighteen's only, it's a game YI fans can't afford to be without.

WINGS

Chrisnexus's tribute to the World War I pilots is a brilliant showcase of their usual graphical finesse and is coupled with three playable arcade sequences. As you earn your wings and progress through the ranks, the game gets harder as the beach step-up your operations and the game's longevity is suitably extended.

WARHEAD

Fantastic was the word used to describe Warhead. Glyn Williams's 3D space arcade/strategy/simulation has you zipping around doing your dastardly to save Earth from being conquered by aliens. A total of 36 missions and some of the most bizarre characters you'll ever meet in a computer game add up to one of the best space related games on the Amiga.

XENON II

The follow up to the Bitmap's ground breaking Xenon was a mega hit. There's more loot on weapons than most people have fingers, tons of levels and thousands of

aliens to kill in a shoot 'em up which dominated the charts when it was released.

X-OUT

Z-Out's lousy brother has you facing off against an underwater armada in a game name too different from X-Type. You start by spending cash equipping your ship from the huge range of available weapons then launching into a superbly lit up with loads of action.

Y

Why, oh why, oh why, aren't their any decent games beginning with Y?

Up, up and unnecessary, with Chrisnexus/Microsoft's three-stage World War I saga, Wings.

PREMIER MAIL ORDER

This market is not yet available and will be sent on day of release.

DEMOS

Fiona Keating's essential guide to Public Domain, your chance to win a hundred free PD disks, plus the usual round up of all the latest shareware releases.

They came from hell, it's proclaimed! Locked together with a vengeance in this well put together demo. Round men show their positive and negative sides, as well as a truly gruesome picture of Michael J. Fox. You have been warned! But to be seen unless at the full moon or with a reputation of garlic for protection. Available from AD&B PD No. 206. 1 meg needed.

Some extremely competent animators from Tobias Reuter, available from S&OFT (No. 85). Playing and viewing those expressive legs with rotating other balls which have a motion-on effect. Cause and effect, don't ya know. Good choice of colours and shadows in a setting of what looks like a school chemistry lab, complete with bottles of chemicals and wooden benches. The photograph of a mysterious woman looks in the background. I wonder why...

Along the R.I.P.C.A. path, in this shot from Sector 16, Animations No. 102, an act of terrible cruelty is being perpetrated. A poor horse gets the wind kicked out of him by a vicious cowboy. The Horse from Bonanza looks

SUPPLIERS' GUIDE

PD Salt: 1 Bryant Avenue, Southend - On-Sea, Essex S21 1TD

Saville PD: Unit 6, Southfield Park, Station Ave, Waterburyville, Leeds, WF7 7JH

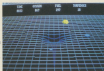

Winn Free PD: 23 Elborough Street, Swinton, SMC 2LS

DEMOS

An interesting collection of futuristic visions from ABOTS (No. 800). Speedy atmospheric music complements the wide range of images which include robot two-headed dogs and the Japanese Armada which is hopelessly outmatched by a laser-beamed space ship. (Theater rules OK as we add our hearts out for the poor robot who has died just short of the first and last. Aahh...

Games Galore from IT 84 (No. 827) contains seven games, one of the most playable being Ping Pong. This game only works for two players, so have your partner ready. Other 64 is also a wizard wizard. You are the pilot of a small space vehicle in orbit, alongside your Mother Ship, around a large black hole. The object of the game is one of survival. You have to learn to not you destroy the outside explored by the giant rational force of the black hole. (You give and successfully randomize and dock with the Mother Ship.

United Graphic Artists company of Sotheby, Japan is, presents... A Space Fantasy. A well crafted piece of animation in which space craft find past your image. The ships drift and rise, wheeling through the darkness of outer space. There is definitely a feeling of flying realistically through the air. The sound accompaniment is well worth listening to as is, especially for whiling away those lonely hours in the solar atmosphere.

DEMO OF THE MONTH

TITLE: Japan Culture Disk
AUTHOR: N/A
SUPPLIER: ADS PD

Some marvelous images from the land of Karaoke and Kinkare. The Japan Culture Disk from ADS PD (No. 830) shows scenes of cute kids doing calligraphy and an ultra-modern Japanese police box in Tokyo. A strange blend of the high tech world and the ancient art of puppetry and Noh plays.

NEW FORDS!

THESE RESULTS WERE CONFIRMED BY SUBSEQUENT INVESTIGATIONS. IN 1978, FOR EXAMPLE, THE FOLLOWING CONCLUSIONS WERE REACHED:

RESEARCH *Journal of the American Academy of Child and Adolescent Psychiatry* 40:10 (October 2001):1099-1106. **OBJECTIVE:** To examine the relationship between the child's perception of the mother's mental health and the child's internalizing and externalizing problems. **DESIGN:** A cross-sectional study. **SETTING:** The study was conducted in a community-based setting. **PARTICIPANTS:** The study included 100 children and their mothers. **MEASUREMENTS AND MAIN RESULTS:** The children's perception of their mother's mental health was measured using a self-report questionnaire. The children's internalizing and externalizing problems were measured using the Child Behavior Scale (CBCL). The results showed that children whose mothers had a history of mental illness perceived their mothers' mental health as worse than children whose mothers did not have a history of mental illness. Furthermore, children whose mothers perceived their mental health as worse had higher levels of internalizing and externalizing problems than children whose mothers perceived their mental health as better. **CONCLUSIONS:** The study suggests that the child's perception of the mother's mental health is an important factor in the child's internalizing and externalizing problems. **KEY WORDS:** child, mother, mental health, internalizing, externalizing.

The first of these is the fact that the
 world is not a homogeneous whole.
 It is a collection of many different
 parts, each with its own history and
 culture. This diversity is what makes
 the world so interesting and so
 valuable. It is also what makes it so
 difficult to understand and so hard to
 control. We must learn to respect
 the differences between the various
 parts of the world if we are to
 live together in peace and harmony.

1997, a 100% increase, and 2000, a 100% increase over 1997. The 2000 increase was due to the fact that the 2000 survey was the first to include the 100% increase in the 2000 survey.

PRICE £9.00

NEW !!! AMIGA JUNIOR PD CLUB AMIGA NEW !!!

Over the last few months we have wondered how parents felt about their children and indeed themselves joining a PD library and possibly receiving unsuitable material... ie Glanour Pics/Offensive language etc... so we decided to set up a subsidiary club where all the disks have been carefully vetted as suitable for all. It is simply going to be called THE JUNIOR PD CLUB and is for any age although the club will be orientated towards the younger end. We have specially compiled a catalogue containing about 300 PD titles, 2 demos and a PD game. We also have some Pens and Badges with the club name on them, we will send a Pen FREE to all new members. For the under 16s we will send a Pen and Badge FREE of charge.

What we have to offer is the following:

* Only top quality branded disks used.

* Again no commitment, No minimum order.

* First-class postage/same day despatch.

* All disks £1.75 each.

We have the following joining offers:

OFFER A
CATALOGUE DISK
PLUS
FREE MEMBERSHIP
PLUS FREE
PEN AND BADGE
PRICE £1.75

OFFER B

**Zydec Micro -
switched
mouse available
at ONLY £14.95**

This is a precision instrument and is a direct replacement for your Commodore mouse. You would have to be foolish not to take advantage of this offer, comes complete with 17 Bit latest disk magazine as well.

Listen to the strange tale of Grail & Blade Computer Dating Agency. From A.B.G. (R) comes the Computer Fantasy Plot 1. An intriguing story with lots of appealing points, which matches your imagination with mystery and optimism. What is it all about? Fear of women? Loveless? The flying path is to be continued. Watch this space.

DEMOS

From A.B.G. (R) comes the game of Seven Seas, which starts some resemblance to Speedball, but not much. The game boasts of having no special rules - you just have to shoot the ball into the opponent's goal. The players look like orange and green ovals who play the age-old game of flicking targets at each other. Plenty amusing with commendable music and graphics.

For enthusiasts of the classic Arabian adventures, the latest 'Tales of the Arabian Nights' is splendid viewing. Taken from the Tokyo computer 1988 by Red Haze, this disc has adventure-style music and subtle use of colours. Older 'Tales' fans may notice some of the same.

A moment of humor and surrealism here. Not really, but A.B.G. proudly announces 'The Juggling Amiga'. A customized Amiga keyboard with red keys which can juggle four balls. Now!

PD TOP TEN

**A-Animation G-Sound M-Utility
D-Game M-Miscellaneous**

- 1 Star Trek Megademo - 2 disks, 1 mag. A
- 2 Batman the Movie - 1 mag. A

- 7 Treasure Island G
- 8 Nightthoughts - 1 mag. M
- 9 Iraqi Demo. A
- 10 Probe Demo. A

Compiled by A.B.G.

'For gashounds and blood freaks everywhere' brings the demo from A.B.G. (R). The Great Old Pt (Little Stone) is still a very rare find for the specialist or to be viewed after a huge helping of gashounds. A case of either last seen or jump forward. One of the pictures depicts a female fashion victim trying to make Street 2 Corner.

OUT OF THIS WORLD!

FIVE COPIES OF THE TOTAL RECALL VIDEO UP FOR GRABS!

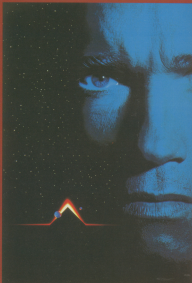

This is the chance that you have all been waiting for. A once in a lifetime offer to win five amazing videos of the film starring that mountain of muscle, Arnold Schwarzenegger. 'They stole his mind, now he wants it back.' No wisecracks, please. See the video and find out if Annie gets cerebral.

All you have to do is answer the following mind-blowingly simple questions. In the film, Douglas Quaid (Schwarzenegger), discovers that he is really a top secret agent on Mars. Name the villainous tyrant who rules this planet. So on your marks, and send your answer to:-

Total Recall
Competition,
CU Amiga
Priory Court
30-32 Parrington Road
London EC1 3 AU

Closing date: 30 April 1991

Not open to employees of EMM Images or any company involved in the production and distribution of CU Amiga or Games Software. Also, any entries received after the competition closing date will be considered invalid.

W I G G L E I T

There's nothing like a joystick review to trigger the double entendre trap. All these short sticks with bumpy tops could turn anyone into Finbar Saunders. But without a joystick most arcade games are as exciting as Porsche without a steering wheel. And few things are more personal than your choice of stick. What kind of a response do you want? And do you want extras such as auto-fire?

If so, what kind?

All of this makes joystick reviewing one of the most feared jobs in computer journalism. Until the International Organisation For Joystick Standards establishes a test centre, there can be no truly objective method of evaluation.

However, hard facts can help your choice. What's the stick's size and general layout? How long is its cord? The action can also be reported with considerable accuracy. And let's not ignore the aesthetics. One of the sticks we looked at was almost too ugly to place near an Amiga!

Finally, there's the road test. How does each stick shape up to three distinct types of game (see box), each of which makes specific demands? In an ideal world one stick would win in all categories but that's probably an impossible dream. So in the hope of discovering an almost perfect joystick, let's power up the first program and plug in that nine pin connector...

And don't let me hear one

'Tearr, tearr.' Okay!

COMMAND MODULE Buxton £17.95

Resembling a top-loading, fold-pencil case with a short shafted, knobby handled stick, the Command Module is the tagged joystick in test, though the hollow sound of its base indicates that its size is primarily cosmetic. Its slider feet ensure stability on a table top; this is not a model for hand holding! The twin fire buttons are similarly inoperative letting you really pound away. The stick has a fairly short travel. There's a small auxiliary switch on the rear side of the base; not the ideal position if you want to change mode during play. But the weird thing about the Command Module is the silver trim which even a five-year-old might hear off in disgust. At least its cord is a respectable 12ft long.

The sticky stick is best suited to sticking around rapidly rather than gliding imperiously. All the same it proved precise enough for IV-type and the large fire buttons were good for frantic firing, though one seemed to fail occasionally. Auto fire is disabled, starting continuously when a button is pressed but interrupted momentarily by stick movements. World Championship Soccer malfunctions were fast but not particularly smooth. Surprisingly for such a short stick, a fair degree of speed was possible with Pardon Freddy but it was harkwork. Despite the alarming rattling amplified by the hollow base, construction seemed fairly solid.

CONVERTA Kramer £9.99

This multi-purpose hand held and table top stick must have seemed a good idea on paper. Unfortunately the method of achieving its characteristic change doesn't work. The short, cant-levered grip, which is rather too small for the average hand, protrudes from a tubed/plastic sleeve base, the bottom of which hinges out so that it can be used on a flat surface. Unfortunately the polypropylene hinges offer too much resistance for the unit to fold up properly and its poorly sutured cap foot won't hold it closed or flat on a table for that matter. At least its 180 cm cord is generous.

Then, just when it looked like there wouldn't be anything good to say about this bizarre innovation, it got five buttons, both mounted on the handle, prone to fire for IV-type rapid firing. The point is extremely short travel also made Sucker an odd experience, especially in hand held mode. The best technique seemed to be pressing the base and the stick against each other. This gave a real sense of action but dragging it right for a game left me with cramps in my left hand. The same two handed approach worked for Freddy but the Converta's far from ideal for joystick jiggling because of the lack of positive feedback.

FLASHFIRE Kramer £8.99

This red and black stick with its good sized grip and reasonable base with excellent action caps looks fairly anonymous. The placing of its base fire button to the left of the stick makes it tricky for left handers though, at least it's supplemented by two triggers on the stick itself. Though these are too stiff compared with the base, more responsive one on the base. The stick feels rather stiff but not unpleasantly so, with good centring and positive click from the microswitches. And though length isn't everything, the 95 cm cord is well on the short side and its (big) base misbehaves. The different responses of the fire buttons were particularly noticeable with IV-type. The grip triggers

were too stiff for pointed while the one on the base was much better balanced but its spring was ergonomically sound. The stick has sufficient inertia for accurate positioning but not so much resistance that movement is tricky. It proved pleasant for Sucker but again the handle buttons were too stiff for accurately timed harkies or pusses. The big, healthy grip and nice movement made life easy in Freddy.

CHALLENGER INFRARED Controller \$24.99

This table-top joystick from Centriver looks like business. Its sleek styling made it stand out instantly from all the other joysticks we examined. It wouldn't look out of place on the coffee table next to a copy of *Vogue* or *The Face*. The handle grip can accommodate almost any size of hand, and the four suction cups on the base of the machine provide effective stability no matter how much pounding the stick is subjected to during play. There's a choice of fire buttons — two located on the hand grip for the thumb and forefinger and two more on the top of the plastic body. These are positioned to accommodate both right and left-handed players with two buttons on either side. All are responsive and issue positive clicks when depressed. As standard, there's also an auto-fire switch and a sliding control for adjusting the rate of fire, both highly useful. The joystick's well-sprung with average travel between the microswitches which provide a responsive feel when in use.

The Challenger is also an infra-red joystick and, as such, is battery operated. A small receptor and with a "thru-hole" cord plugs into the usual joystick ports at the back of the Amiga with a small transmitter connected as an integral part of the main joystick. This gives an extra 5ft. on top of the cord length and can operate inside a 45° reception area. Initially, I thought this might be slightly restricting, but in practice the joystick worked perfectly with no interruption of the signal.

The Challenger not only looks good, but it also plays like a dream. The many extra uses and methods of handle in R-Type proved a stroke, and the stick proved to be equally responsive and maneuverable when having a lock around with

PROF 9000 DE LUXE Sticker \$10.99

Another rather anonymous black and red number but at least it looks solid. The base is a little large and clumsy for hand-held use and its four suckers are too springs to do the job properly. The sticky stick is easy but with a very short travel. However, it's nicely sprung and the fire button on top of it feels pleasantly under the thumb. At the front corners of the base are two more buttons with a similar feel. Depressing and rotating the left hand one changes the rate of auto-fire. Sadly, you can't have the base and stick buttons active at the same time; there's a selector switch on the bottom. The 140 cent cost is fairly generous.

With R-Type, the inability to use all the buttons simultaneously was irritating. However turning up auto-fire resulted in a steady stream of missiles, allowing me to concentrate on manoeuvres. Here the stick's response proved extremely well balanced. The Prof's easy motion also suited *Centriver* the short travel seemed to fall very easily into the horizontal, diagonal and vertical positions. While this may be useful with certain games, it wasn't fluid enough for *Iceberg*. The short travel also caused against it in *Phantasy*, concentrating the wiggly action on the wheel rather than allowing for to put some shoulder action into it.

TURBO PRO Quick Gun \$12.95

Looking better than most of the sticks under review the Turbo Pro also has a handle that would make a turnbush. It's short, not and rather nice! However the grip, stylishly rounded base sits happily in the hand and the stick has a nicely balanced action with a positive, sturdy feel. It's a little large for handheld play though and doesn't have suction cups (but small pads which tend to slide around the tabletop). The fire buttons, on either side of the base are fairly stiffly sprung but very accurate. Below there is a long slider switch for the auto-fire, with an LED to indicate if it's on which is a sensible touch. The cost is a rather meagre 1200ms.

With R-Type the soft touch fire buttons lacked the tactile feedback necessary for building up fast firing speeds but the auto-fire is nicely timed and featured advance some good scores. Stick action was well balanced too. While a little more movement in the stick might have been nice for *Blazer*, its solid feel encouraged me to really let go with the wrist action and the buttons behaved accurately. For *Phantasy* it was wonderful, fast and just about large enough for *turkey* jiggling. And again the fire buttons' sensitivity ensured accurate timing.

STING-RAY Logic 3 \$14.95

A classic stick, handheld stick, styled somewhere between a sub-machine gun and an American car of the fifties, this one is certainly different. There's a single trigger built into the curved handle which sits comfortably in the palm. The other hand controls the big stick which has an

easy but very short travel and good centering. Towards the front is a slide switch for auto-fire. The whole thing's completed with a lengthy 1.75m of cable.

While this design is suited to either left or right hand use it's ideal for neither. I'm right handed so that's the way I'd use to hold a pistol. However that leaves the moving the stick with my left. But if I used my right hand for the stick with R-Type I got cramp in my fast firing left forefinger! Using auto-fire helped alleviate this, though it's not the fastest I found. The short stick did nothing for manoeuvring, though. The trigger helped achieve well timed tactics in *Scorcher* but the stubby stick transformed would-be graceful turns into somewhat sloppy revolutions. I expected it to be similarly unsuited to *Phantasy*'s joystick juggle but its easy action made it a fair move.

Champion 12 Pro
Sticker. One fast action *Phantasy* stick, which normally gives the feeling of many a joystick, put up little resistance.

In all, a fine rate joystick, easy to use and extremely portable.

HANDS ON EXPERIENCE

MULTI DPI MOUSE

- 4-25 Pin Adapter
- 3 1/2" - 5 1/4" Disks
- Mouse Pouch
- Mouse Pad
- Variable Dpi from 100-800 Dpi
- Hardware switchable between PC mode & Microsoft mode
- Micro switch buttons
- Compatible with IBM PC-ST-AT and Compatibles
- 1 Year Guarantee

CHALLENGER JOYSTICK

- Ergonomically designed handgrip
- Auto-fire with adjustable shooting speed
- Micro switches for durability
- Suitable for left or right hand players

- 40" Operating distance (Infrared models)
- 45 Degree reception (Infrared models)
- Available in Grey or Clear
- CarMe joystick model for Amiga - Atari
- Infrared model for Amiga - Atari
- C&M 128-605 & 60C Sharp X1 Engines
- The only infrared joystick for Sega Mega Drive

Infrared joystick requires one Pro PRT battery

FIVE IN ONE MOUSE

- Compatible with
- Amiga - Atari ST
- Commodore PC-III Series
- Amstrad PC
- Schneider Euro PC - AT286 Machines
- 128 Dpi resolution
- Tracking speed 150mm/sec
- Microswitch buttons
- Mouse Pouch
- Mouse Pad
- 1 Year Guarantee

WIGGLE IT

STAR PROBE
Olivetti £14.99

As chunky as a Yoke, with no fewer than four fire buttons, and an auto-fire switch, veteran stock specialist Olivetti's Star Probe is intended for table-top use. The fire and auto-fire buttons are positioned, in my modest opinion, at least, with its two fire buttons falling under the thumb and forefinger. The auto-fire switch lies between the two base fire buttons, so it's easy to change during a game. There's a sliding switch on the back of the stick, though, and one of the trigger buttons rattled rather alarmingly. The cord is a reasonable 120-in.

Though the Star Probe looks top-heavy and its action seems rather free, it proved fine for A-Type, though some may prefer a little more resistance. Unusually the auto-fire didn't away at a fantastic pace if you leave the buttons alone but pressing them stops it. This was ideal for A-Type when you alternate between fast fire and slowing things for big shots. The chunky handle and easy movement came into their own when I ran on the Joystick patch. Though again it seemed a little too free and ratty to inspire confidence, but Parodius-Arcade defeated it. While its jiggle was extremely fast, the fire buttons seemed to give up the ghost from time to time.

ZOOMER
RC Simulation £87.99

Unlike any of the other sticks, the Zoomer joystick is intended for simulation specialists. Looking like it might have emerged from a plane, though also suitable when hand-held, it evokes a steering wheel is required, it's a hefty piece of kit, 30-cm tall and almost the same across the yoke. The handle itself has massive side sideways rotation but the vertical axis is considerably less stable. There are the buttons on top of each arm of the yoke which have a distinctly soft feel. On the base is a knob to control the rate of auto-fire. There are four suckers to keep everything stable, it might take a bit of spit to encourage them. The base is almost 300-ums, meaning you can almost sit in the next room while playing.

Hardly surprising the Zoomer proved totally unsuitable for the rigours of R-Type, but for football and - didn't even submit it to the Big Top feature. I've always felt that driving games were best served by a normal controller. There's no similarity between moving a vertical stick sideways and turning a wheel or handlebars. So I settled up for Microsoft's motorcycle game, the Ultimate Ride, with the Zoomer. Its strong inertia helped me keep on the track, making doing the too-much simpler and more foolproof. If you mainly play arcade games, the Zoomer's cost cannot be justified, but if you're a sucker for flight, car or bike simulations it certainly adds a new dimension.

TURBO BLASTER
Computek £19.95

A small-on-rectangle feel with suckers makes the Turbo Blaster suitable for table or hand-held use - providing your hands aren't too tiny. But the short, 120-cm cable means you can't stray far from your computer. There are fire buttons on either side of the base and at the top and front of the vertical grip, which is considerably narrower. The stick itself is about average and positive, with definite clicks from the micro-switches. The base is marked with compass points on its diagonals. There's no auto-fire.

With R-Type the stick's weaknesses seemed well balanced, though a fashion more hand might have made life even easier. The fire buttons are slightly ratty and not precise enough either. While that big grip gave a lot of leverage for making sweeping 360-degree sweeps, once again the movement seemed too short for really instinctive play making accurate positioning tricky. The soft action and big handle work at home in Caddy's Big Top though. However I'm not sure how long it would last if subjected to jiggling for hours on end.

JOYSTICK COMPO

When we broke the news to Condriser that their stick had won the supreme accolade of being named the CQ 'Joystick of the Month', they were quite rightly overjoyed with emotion. To celebrate such auspicious an occasion, they've stamped up the readers for 10 superb prizes of their brand new white-red Challenger joystick (see review). It really is a first class stick. If you'd like to get your mitts on one, and a smushing Condriser (child) into the bargain, all you have to do is match up the right answers to the three questions printed below and send your answers on a postcard to: CQ Amiga, Priory Court, 38-52 Parkington Lane, London, EC2N 3AN. All entries must be received by 1st May, 1991.

1. What game topped the Amiga charts last Christmas?

- A. Teenage Mutant Hero Turtles
- B. Power Ranger
- C. Disk Tricky

2. How many Amigas have been sold in the UK?

- A. Over 500,000
- B. Between an Amiga?
- C. Not likely

3. Which athlete gave his name to a series of joystick-smacking games?

- A. Daley Thompson
- B. Lyned Christle
- C. Eric Bristow

MUSIC DIY

This month's column takes a look at the new Trilogic Stereo Sampler. Martin Walker, CU's musical maestro, awards the marks out of ten.

TRILOGIC STEREO SAMPLER Mk.II

Trilogics have been providing a useful service for some years now; they market a wide range of collecting leads and hardware accessories for many computers. Value for money always seems to have been foremost in all their products, so I was interested to get the latest version of their stereo sampler.

Until recently the company have been selling their mono and stereo samplers as hardware only packages, although a PC sampler disk has been included sparingly; most people have opted to buy the Automaster software at the same time. Now, Trilogics have put together with Broadward buttons and a disk with fully working software accompanies each hardware cartridge, as well as an audio lead and instruction leaflet.

THE HARDWARE

The cartridge plugs into the parallel port and has a printer through port mounted on its top surface; this allows your printer and sampler to

be attached simultaneously (via an auto printer adaptor — an extra £14.95). When the printer is switched 'on line' the sampler is automatically disabled. If you need to swap a bit then this will save a lot of wear and tear on the printer port! Unusually there is also an input level control; fixed level outputs can then be adjusted for optimum input level to the sampler. (Incidentally this is by popular request, for use mainly with CDs). The input port is a simple 3.5mm stereo jack, and both mono and stereo plays can be used.

I tried the hardware with the supplied software as well as the software from Technosound (reviewed last month) and Automaster II — these are all competitive, as are most others. How did they compare? As various sampler rates and with different types of signal there was little audible difference — after all, since the signal comes out of the cartridge the Amiga hardware rather than the software determines the quality. The differences between software design come down to facilities and ease of use.

The next step was to compare the different hardware cartridges in turn, each with the same software. This produced some more interesting results. Firstly, as well as the input level control, Trilogics have included a sub-range of amplitude control. Normally I have to take a least two of the headphones' sockets of my amplifier to get enough level (not ideal for a quality signal), but the Trilogics cartridge is happy with a lower level input, and would be connected directly to the outputs of headphones, cassette decks, and many other devices that normally strain to give enough signal for budget samplers.

Comparing the sound quality, I could hear a difference, but it was small, even to my trained ears! The background noise that you hear

just before the signal finally dies away was different in each case, and the Trilogics hardware seemed slightly more sensitive at these low levels. The clarity of this device is certainly more advanced than that of the Technosound, with better shape and additional tone adjustment (the control of the signal, ensuring zero output with no input signal) and the widest possible

dynamic range. However, both will produce 'clean' samples — the care you take in setting up an optimum input level may well be more important to the resultant sound than anything else. Sample rates of up to 1000Hz are possible with the Trilogics hardware, but in practice the Amiga and software will restrict this to more like 44 1000 in Mono mode, and 2200Hz in Stereo, so this becomes rather academic.

THE SOFTWARE

The supplied software has an impressive musical editing sequence. Pressing the left mouse button takes you to the sampler, and Trilogics themselves admit that the program is not primarily a hardware device with the software as a bonus. In spite of this it performs well, but doesn't expect the bells and whistles of other packages. For sampling and measuring of the input level most you can use your ears (always the ultimate test) to set optimum levels.

The waveform occupies a full half of the screen for a clear display, and the zoom function can be magnified further than any other package that I've seen! Cut, copy and paste buttons all work in traditional fashion, but the stereo mono

button reads the wrong way round. There are also useful options to toggle the hardware low pass filter, and a section of the sample, reverse or transpose it up or down by one or more octaves. The second and playback sample rates are adjusted with coarse and fine control buttons for either direction, but curiously samples play back at a slightly different pitch even when both rates are identical. There are no looping or treatment options, and Load and Save are rather primitive; they take you back to the Workbench to type in your file name, and no Directory option is provided, so you need to know what's in the disk before you can load anything.

ASSESSMENT

The hardware alone has many merits. The inclusion of the printer-through port and the input level control are extremely useful, especially for people who wish to sample from fixed output CDs. The circuitry is undoubtedly superior to the budget samplers, but it provides the difference in audio quality is quite small. If you want the best specification, and are happy to pay £139.95, then coupled with the Automaster II or all software this is an extremely good system. As a stand alone package the software runs to down; it compares well but doesn't have any of the creative options that many sampler owners seek in.

ADDITIONALS

With a bewildering array of Amiga peripherals and software packages available, it's often difficult to decide on that all important new joystick or printer. Help is now at hand with the definitive CU guide to help you get more out of your Amiga. Each month Chris Jenkins reviews the best in books, disk copiers, stereo speakers, disk drives, and other important accessories.

VIDEO

HOME TITLER

Last month, we looked at a couple of software packages designed to help you add professional-looking captions to your home video productions. Considering that a less flexible dedicated hardware captioning system can cost more than your Amiga, these software packages (including the Alternative Scroller and ZVT Video Studio) are remarkably good value for money.

Home Titrer, though, may be the biggest bargain yet at £39.95. It's a very simple and very easy-to-use program which can produce remarkably impressive results. The drawbacks we'll get to in a minute!

Presented in a crystal case with a single disk and brief 8-page instruction leaflet, Home Titrer can be backed up freely. After an impressive scrolling intro screen, clicking on the left mouse button gets you to the main display, which has a function menu at the bottom and a display area with a cursor at the top.

Type in some text, using RETURN to move to the next line, and you will see it appearing on the display. Click on the buttons 1-8, and the font changes. The eight fonts vary from the conventional to the modernist, and are all very usable, but their sizes are fixed, so you may get a message telling you that the font you have selected is too big for the text to fit in the line space allowed.

If that's the case, you may be able to save the day by using the letter spacing

option: clicking on SPACING +/- expands or compresses the lettering on the current line.

There are four colour boxes which allow you to change the colour of the current line, clicking on the Palette button allows you to alter the four available colours using slider bars. Confusingly, the bars are headed not RGB (for Red, Green, Blue), but RVB (for Rouge, Vert, Bleu). The program's French, see: licensed from Konatek.

You can also add shadowing to the text; you have a choice of eight directions, plus variable depth and selectable colour. Outlining is another option, but here you must be careful that the text colour gives sufficient contrast from the background. Margin width, centering and alignment can also be set before you move to the Edit section.

The Edit page presents you with a new menu allowing you to set the type and speed of display. There are three basic display options: vertical scroll, horizontal scroll, and static page. From these you also have a choice of automatic or mouse-activated scrolling, and you can set the speed of scroll and delay between pages.

Home Titrer produces remarkably smooth and impressive results for such an inexpensive package. Apart from the RVB confusion, the only problem is, that while you are supposed to be able to import new test fonts, there's no information included on how to do this.

A more professional package, Pro-Titrer, which includes 40 styles and faces, is in the works; we'll give it a look as soon as possible.

EDUCATION

GAME, SET AND MATCH

Educational software on the Amiga is scarce, despite the obvious advantages of a fast machine with excellent graphics and sound.

Game, Set and Match is a good attempt to make the most of the Amiga's facilities in a way which will be entertaining for young children. Unfortunately, it runs a little slowly in places; children tend to start tapping if they have to wait over a minute for a block of text and graphics to load.

Still, the use of colour and sound is good and there's enough here to keep even the most skittish child occupied for a good few hours.

The main display features a game-like-looking juggling clown, and prompts you to choose from seven playing exercises. Options (such as the speed of the exercises and sound on/off) or Exit. The exercises include Colour Match, Shape Match, Number Match, Money Match, Shape Sequence, Reaction and Higher/Lower; it should be clear from the names what the games consist of. In Colour Match, for instance, a cursor moves along a sequence of differently coloured squares; you click the mouse button when the highlighted colour matches that of a large square at the bottom of the screen. The other games follow in the same way.

At £19.95, Game, Set and Match is a nice little package and fair value for money. The packaging doesn't suggest any particular age group it's suitable for - judging by the current state of the education system, I'd say about 17-year-olds.

FACILITIES	9
EASE OF USE	9
VALUE FOR MONEY	9
OVERALL	9

A colourful, well-programmed educational package with plenty of variety for the younger audience.

WHAT IS IT - WHERE IS IT?

Gensoft's series of 10 educational programs have some other possible applications too: the series kicks off with Volume 1, British Isles and its Counties.

The disk can be backed up, and the main screen gives you the option to choose various exercises, such as identifying a county from its outline, (with or without clues), placing the shape in the correct position on the map, and so on. The novelty fairly soon wears off, and while it's decently designed there just isn't enough scope or variety in the program to make it that thrilling.

The gimmick is that all the files are available as PPF files for use in your own DTP and video programs, so if that idea turns you on, it might be worth considering.

FACILITIES	5
EASE OF USE	5
VALUE FOR MONEY	5
OVERALL	5

A rather limited and unexciting program, hardly worth the money unless you have some use for the PPF files.

KIDS TYPE

Kids Type is not what you may assume, a typing tutor for the young; true, it does encourage use of the keyboard, but it's more an exercise in spelling and combining words than in teaching the old QWERTY keyboard.

The program's aimed at 4-to-8-year-olds, and costs £24.95. It comes in a sturdy plastic case on a single disk, which can be backed up, with a 10-page glossy instruction leaflet.

The main display is very colourful, featuring an illustrated alphabet and icons for picture, shape and other exercises. Prompts and any text you type in appear in the centre of the display, and you can pick up the pictures from the border and position them anywhere among the text - in other words, you can put together your own alphabet teaching games.

There's also a 100-word library which you can scroll through, picking out the words you want and dropping them into the window to assemble simple stories. The function keys allow you to insert spaces, into the lines of text at the cursor position, insert a whole blank line, delete words and so on.

Another part of the program is a spelling game, which starts with a library of 26 words, which can add to be creating your own ABCs list. At the bottom of the screen are action boxes which allow you to switch on or off the Amiga's built-in speech facility, alter the screen colours and the text scrolling speed. Text or graphics can be dumped to a printer. Files can be saved for later reuse, and you can change either the

font or the pictures using a standard graphics package such as Deluxe Paint.

Despite its slightly misleading title, Kids Type is a well-programmed and particularly colourful program which should encourage any child to lay aside his joystick and concentrate on the keyboard for a change.

PROGRAMMING

BBC EMULATOR

At first sight you might wonder why anyone would want to make the mighty Amiga emulate the slow, weedy, shonky BBC B, the answer, of course, is Educational Software. Let's get one thing straight from the start: the BBC Emulator will NOT let you run Basic games on your Amiga. It will cope only with Basic programs, and some 6502 sub-routines, but not with programs which dodge the operating system and go directly to the screen or other hardware.

At £26.95, in effect the program 'turns part of your Amiga into something rather, but not exactly, like a BBC Model B with Basic 2 and CP/R', as the manual puts it. The clever part is that it doesn't kill off the Amiga's natural advantages, such as split screens and multi-tasking, so you can run other applications, even PC applications if you have a bridge-board, at the same time as you write or run BBC programs. As you might have

ADDITIONALS

guessed, the Emulator actually runs BBC Basic up to seven times faster than the original, though the performance isn't so impressive with pure 6502 assembler routines.

The principal components of the package, which comes on a single disk with a 40-page manual in a sturdy plastic case, are 666602, a bridge from the BBC OS to the Amiga, supporting nearly all BBC class including TX calls; DFB, a "disk handling system" (75) which is a bridge to the Amiga DOS; 6502, an emulation of the 6502 chip written in 66602 assembler, complete with a Monitor based on the old PET monitors like Supermon; and 6666C, a 66602 version of the Beeb's Basic, which is a very highly-regarded version. There's also a CLI environment entered using the VGO command.

The Emulator needs at least 300K free, and runs happily on 66020 or 68020 processors. Amiga keyboard and preferences settings will function, but certain keys are used by the Emulator to imitate the Beeb functions keys, cursors, Delete, Copy and Break.

The Emulator supports a range of BBC graphics modes including teletext display, and a range of VDU calls. None of the tape loading commands have any function, and though the serial and parallel port functions are supported, so

you can transfer data directly from your BBC to the Amiga, there are several limitations and complications which may make it difficult to use other devices such as printers successfully from the Emulator.

If you are interested in mathematical applications, you should note that the Emulator uses the Amiga's fast floating point routines - these are very fast, but work only to four bytes precision, as opposed to the BBC's five, giving six rather than nine decimal points of accuracy.

There's little point in trying to avoid the BBC Emulator marks out of ten, since it's in a field of its own and is obviously going to appeal to a very specialised market; but if you think you have an application for it, try to arrange a demo before you take the plunge!

DESKTOP PUBLISHING

PROCLIPS

Proclips is a collection of structured clip art for use in your favourite DTP package such as Pro-Page 1.3 or greater, Pagestream II or Pagestream 2.1. For £24.95, you get two disks of artwork by Chris Barnardo, and a booklet illustrating the collection.

Designed using Pro-Draw 2.0, the clips can be used in black-and-white or colour without loss of quality, and can of course be resized to your requirements.

The collection includes technological images including digitised computers, jets and record decks, iconic heads and slides, film cameras and floppy disks, in Flags and Warnings you have BBC, US and some other flags, standard BBC hazard warnings such as Fire, Laser and Radioactivity, No Entry, First Aid, and a charming Mr Bultbit symbol.

Money and Credit includes charge-cards, digital numerals, jetty dollar and pound signs and datestamps. Special Occasions has wedding bells, parrots, candles and what looks like a fairy cake.

White and Brown Goods features iconic representations of computers, cameras, radios, TVs, cameras, microwaves, kettles, blenders, batteries, fridges and suiters.

Arrows, Stars and Stamps contains several straight and bendy arrows, flashes and caps, plus for some reason a kettledrum. Dordent, Pins, and Letters is pretty self-explanatory, while Maps and Miscellaneous features, get this: a football, an eraser, a snake, a pair of dice, an outline map of the British Isles and a lump of cheese.

ProClips claims to give you more "clips per pound" than its competitors, but of course the deciding factor is whether you will find them of use.

Though the quality is good the subject matter is very mixed, and you will have to decide whether this selection represents value for money for you.

WEATHER WATCHER

Studying the weather must come second only to train-spotting in most people's lists of boring things to do, but it's a credit to Weather Watcher that it manages to make this most stuffy of subjects vaguely interesting.

The T24.95 package requires TME2 to run, and comes on a single disk in a sturdy case, with an 8-page glossy instruction leaflet. After a terrific intro consisting of a map of the British Isles joggling around surrounded by weather symbols, we get down to the nitty-gritty, which is in effect a database allowing you to enter and statistically analyse meteorological information.

The database automatically loads a default data file named THISYEAR, the file supplied is a fictional set of figures relating to 1986, allowing you to try out all the program's functions without having to painstakingly enter data.

Option boxes along the side of the screen allow you to choose functions such as typing in data for temperature,

wind speed, rainfall and so on for a particular day. This data can be displayed in bar chart form, and extended into more complex databases, which can be viewed and compared. You can also make you own weather maps, modifying the Deluxe Plot format maps and weather symbols, and placing them as you require. To add to the fun there's a definable scrolling message surrounded by weather balloons, though mercifully these are optional.

Not being a great meteorology expert, I can't really say whether this package takes into account all the fun you would require to become a junior Michael Peck still, it's colourful and easy to use, and in an educational context should be an aid to teaching statistics and data-gathering as well as spilling the beans on the great English season.

BOOKS

AMIGA PRINTERS INSIDE & OUT

ANDREW D. SMITH

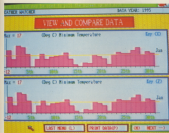

If only because most printer manuals are all but incomprehensible, it's useful to have a backup source of information, and this volume is agreeably specific. The ten chapters - illustrated with diagrams and painstakingly uniform cartoons - cover printer installation, the Amiga DOS shell, printer control from Amiga Basic, graphic and character definition, creating daisy-wheel printer drivers, using ink jet printers, and accessories like sheet feeders, printer interfaces and buffers.

There are long sections devoted to getting the best out of your word processor - unfortunately the examples used are BeckerText and TextPro, which aren't perhaps the best examples for the UK market - but you have to remember that this book has been translated from the German.

The programs on the accompanying disk include PrinterTool, which controls features such as bold, italic and underlined printing; ScriptFile, which adds printer commands to your AmigaDOS shell; and printer drivers for various machines.

Appendices include wiring diagrams for serial and parallel port printer cables, but it has been suggested that there are some potentially confusing misprints here, so don't rely on them entirely.

Lots of useful information here, but at the price it can't be unreservedly recommended unless your printer has you totally baffled!

NEXT MONTH Already established as the ultimate magazine for the discerning Amiga owner, CU Amiga's May issue is going to make the competition look decidedly obsolete - so that it would take much! Heav! what we've got lined up for you... **ALL THE BEST NEWS AND**

PREVIEWS Our In Development features are the most up to date and informative in any magazine, and bring you all the details on all the best games first. Not content with exclusively unveiling *Chuck Rock*, *Leander*, and *Snow Brothers*, next month we'll be covering even more of the hottest forthcoming titles in our own, detailed and informative style. What are the games? Stay tuned...

REVIEWS, REVIEWS, REVIEWS (NOT TO MENTION A LOT OF PROMISES!)... In the continuing saga of the next

month page-and-its-many-broken-promises, for our May issue we're certain that we'll be bringing you reviews of (deep breath) *Leander*, *Pygnosis'* catsey-console-beater, *F-15 II* from those gangha chaps at Microprose, U.S. Gold's eagerly-awaited *Shadow Dancer*, and whilst talking about all things U.S. G., we'll also have Delphine's *Cruise For A Corpse* and SSI's *Eye Of The Beholder*. Also, the winner of the game that has appeared most in 'Next Month', Ocean's *Epic* is due for the CU treatment, as is the long overdue *Billy The Kid* and Microsoft's *The Killing Cloud*. And if that wasn't enough, you can also expect reviews of *Bold's Tale II*, *Shi On Die*, and *Hydra*. What a lot we've got!

YE-HAWWWWWWW! With *Billy The Kid* in for review, we take a dangerous

excursion into the roatin' roatin' Wild West and cast a nostalgic gaze back to the likes of Roy Rogers and Trigger, John Wayne, and the REAL heroes of the Wild West. In addition, May's CU takes a sporting theme as we unveil one of the hottest sports games yet to hit the Amiga. We've also got a few more surprises up our devious little sleeves, all of which will be revealed next month. **FLOPPY POWER** The

fourteenth addition to our CU Collection features two fully playable demos of top forthcoming releases. First of all, we've got an exclusive level of a superb new blaster which we'll be unveiling next month, backed up with another level of one of the hottest platform romps around.

NEXT ISSUE OUT ON THE 26th APRIL

BILLY

The KID

BILLY THE KID IS A 1 OR 2 PLAYER ACTION-STRATEGY GAME SET IN THE WILD WEST, WHICH ALLOWS THE PLAYER TO ASSUME THE IDENTITY OF EITHER A GUN TOTTING DESPERADO WITH A HEART OF GOLD, BILLY HIMSELF, OR HIS ELDEST FRIEND. SHARP SHOOTING, LAW MAKING, PEACE OF THE COMMUNITY, SWEET PET GARIBOTTI.

THEY ARE IN LOVE WITH THE SAME WOMAN AND ULTIMATELY, IN A NAIL BITING CLIMATIC FINAL, ARE GOING TO END UP POINTING GUNS AT EACH OTHER. ONLY ONE CHARACTER CAN WALK AWAY FROM THIS

SHOWDOWN - BUT THAT'S JUST THE WAY OF THE WEST.

ATARI ST
CBM AMIGA

AMERICA'S TOP SECRET WEAPON

Super-charged super-fighters who risk all defending America against the world's deadliest forces.

A combat unit of indomitable strength and courage.

A rescue team of unparalleled skill and daring.

THE BEST OF THE BEST

NAVY SEALS

**SPECTRUM
AMSTRAD
COMMODORE
ATARI ST
CBM AMIGA**

A non-stop, action-packed arcade style thriller based on the heroic missions of the world's most elite, superbly trained commands unit... the U.S. NAVY SEALS.

You have a number of perilous missions to complete. Out-manoeuvre the enemy, destroy hostile missile sites and rescue the hostages.

You begin with the briefing you may end with a victory. It's the middle ground that's brutal.
